The present report constitutes the 13<sup>th</sup> annual report of the Concession Company "Attiki Odos S.A.", and the Operation and Maintenance Company, "Attikes Diadromes S.A.", and relates to the period from January 1<sup>st</sup> to December 31<sup>st</sup> 2021. The annual report describes the activities relating to the operation of the motorway and includes all activities of "Attiki Odos S.A." and "Attikes Diadromes S.A." in relation to the operation and maintenance of the Attica Tollway Project.

## OUR VISION

Attica Tollway, being a pioneer in the field of modern motorways in Greece, aims at actively contributing to the reduction of road accidents in Greece, providing high quality services to its users while constantly promoting road safety culture in society.

Our goal is for Attica Tollway to continue to be a model of excellent maintenance and operation of infrastructure, making a substantial contribution to society, applying responsible Sustainable Development practices to benefit all parties involved and, of course, its employees.

## PAST & PRESENT

Attica Tollway is one of the major European urban motorways and the first big co-financed project in Greece which constituted a model in terms of construction and operation for subsequent road projects in Greece.

Within the 21 years of its uninterrupted operation, Attica Tollway changed road transportation in Greece by raising the standards provided in terms of safety and quality of service, while it remains an integral part of the daily routine of thousands of people, contributing to the improvement of their quality of life.

# ATTICA TOLLWAY **THE PROJECT**

05

**Attica Tollway is a modern motorway, connecting 28 municipalities of the Athens Metropolitan Area and it meets the transportation needs of millions of people every year.**

It is an urban motorway bi-directionally separated by dual carriageways, each consisting for most of its length of three lanes and an emergency lane (hard shoulder). The suburban railway of Athens has been constructed and it operates in the central median of the motorway.

Attica Tollway constitutes a unique European infrastructure project, since it is essentially a limited access toll motorway within a metropolitan capital city, where traffic flow is dense. Attica Tollway is part of the PATHE road axis (Patras – Athens – Thessaloniki – Evzoni) and connects the Athens – Lamia National Road leading to Thessaloniki with the Athens – Corinth National Road leading to Patras, by-passing the centre of Athens.

Being a “closed type” motorway, it has full access control and it consists of two sections, which are perpendicular to each other:

- ▶ The Elefsina – Stavros – Spata Airport motorway (ESSM), extending for approximately 52 km, and
- ▶ The Imittos Western Peripheral Motorway (IWPM), extending for approximately 13 km.

*Attica Tollway incorporates part of the Egaleo Western Peripheral Motorway (EWPM), extending for approximately 5 km.*

The smooth and harmonious integration of the urban-type motorway into the environment, without causing any disruption to the natural environment through its operation, was a key priority in the construction of Attica Tollway.

In the Imittos Western Peripheral Motorway section, an attempt was made to fully restore the landscape using the technique of excavation and backfill (cut & cover) for the construction of tunnels and planting their cover for facilitating the passage of the local fauna. In order to harmonise the motorway with the natural environment, extended planting was carried out on both sides of the motorway, with plant species compatible with the existing flora, which acts as a filter, absorbing exhaust emissions from vehicular traffic. The initial planting, which included more than one million

(1,000,000) trees and plants, was completed in the early years of the motorway's operation with thousands of new species, while the existing underpasses were used for the crossing of farm animals. Additionally, the local fauna is protected by a high fence placed along the motorway right-of-way. A special arrangement of adhesive stickers were used to prevent birds from crashing into the glass noise barriers, a technique applied in compliance with international standards.

Attica Tollway vastly contributed to the flood protection works in the Athens Metropolitan area: during the construction phase, works were carried out in big streams, torrents and rivers crossing the motorway, in order to ensure the safety of traffic, as well as to improve the storm water flow within the Attica basin.

The extensive sewerage and flood control works were performed with respect to surrounding nature and constitute the middle part (due to the geographical location) of the layout of the road works of the complete and unified design of the flood protection works in Attica. "Attiki Odos S.A.", took advantage of the large amount of excavated material produced by the various construction sites during the construction phase of the project and in cooperation with the Athens Planning Organisation and the Forest Directorate of Athens, launched an effort for the regeneration (in terms of morphology and environment) of disturbed terrains of old quarries. Under the supervision of the Athens Planning Organisation and the Forestry Services, over 15,000,000 m<sup>3</sup> of excavated material was used for the regeneration of the old quarries. At these sites, the Local Administrations have created walking and leisure areas, areas for holding cultural events, as well as providing sport facilities.

Total length	<b>70 km</b>
Service / side roads network	<b>150 km</b>
Interchanges	<b>29</b>
Motorway overpasses	<b>100</b>
Motorway underpasses	<b>25</b>
Rail bridges	<b>38</b>
River / Stream bridges	<b>21</b>
Pedestrian overpasses	<b>12</b>
Tunnel / cut & cover sections	<b>56</b>
Total length of tunnel / cut & cover sections	<b>12.6 km</b>
Flood protection works	<b>66.7 km</b>
Motorist Service Stations – M.S.S.	<b>4</b>
Operation & Maintenance Centre	<b>1</b>
Customer Service Centres – C.S.C.	<b>13</b>
Toll Stations	<b>39</b>
Total number of toll lanes (gates)	<b>195</b>
Toll Collection (T.C.) lanes with potential electronic function	<b>39-96</b>
Toll Collection (T.C.) lanes with potential manual function	<b>99-156</b>

## CHARACTERISTICS OF THE PROJECT

*IN ATTICA TOLLWAY, THERE ARE FOUR (4) MOTORIST SERVICE STATIONS (M.S.S.) WHICH OPERATE ON A 24-HOUR BASIS AND INCLUDE PETROL STATIONS, VEHICLE REPAIR CENTRES, SNACK BARS, ATMS/ CASH WITHDRAWAL MACHINES, AS WELL AS CUSTOMER SERVICE CENTRES.*

# PROJECT KEY DATES

08

- 
-  **28/02/1995**  
Submission of tender for the construction of the project
  -  **23/05/1996**  
Signing of the Concession Contract
  -  **16/12/1996**  
Ratification of the Concession Contract
  -  **06/03/2000**  
Financial close for debt financing
  -  **19/03/2001**  
Operation commencement of first motorway section
  -  **28/03/2001**  
Operation commencement of “Eleftherios Venizelos” Athens International Airport
  -  **24/06/2004**  
Completion of the Main Concession Project
  -  **13/08/2004**  
Opening of the Athens Olympic Games
  -  **03/2008**  
e-PASS interoperability with Moreas Motorway
  -  **11/2008**  
e-PASS interoperability with Olympia Odos Motorway
  -  **12/2012**  
e-PASS interoperability with Aegean Motorway
  -  **03/2013**  
e-PASS interoperability with Rio – Antirion Bridge
  -  **12/2014**  
Founding member of HELLASTRON
  -  **11/2020**  
e-PASS interoperability with Nea Odos, Kentriki Odos and Egnatia Odos, Interoperability throughout the Greek Motorway Network

There are significant benefits resulting from the construction and operation of Attica Tollway, since the project:

- ▶ Forms the main backbone that links all modes of transportation and infrastructures of Attica, i.e. road (connection with the national road network), air (connection with the Athens International Airport “Eleftherios Venizelos”), rail (connection with metro and suburban rail stations) and sea (connection with Piraeus, Lavrio and Rafina ports);
- ▶ Reduces traffic volume within the capital, by absorbing a significant portion of the total daily crosstown traffic across the Athens metropolitan area;
- ▶ Promotes the strategic restructuring of the energy and telecommunication networks;
- ▶ Contributes to the physical planning and urban development in the Attica prefecture;
- ▶ Contributes to the residential and business development of the remote areas of Attica.

In the early 90’s, the Greek State held an international tender for the design, construction, co-financing and operation of the “Elefsina – Stavros – Spata A/P and Imittos Western Peripheral Motorway”, utilising the “concession contract” type. The Greek group of companies, named “Attiki Odos Joint Venture”, was the successful bidder of the tender, with the new motorway ultimately named after the corporate name of the winning group.

The Attica Tollway project was completed in time and its construction cost (EUR 1.3 billion) was financed by a 34% contribution by the Greek State, with funds drawn from the EU Community Support Framework, while the Concession Company, “Attiki Odos S.A.”, covered the remaining 66% by investing capital in terms of equity contribution and bank loans. The loans to the “Attiki Odos S.A.” Concession Company, were provided by the European Investment Bank (EIB) and Commercial Banks, whereby the “Attiki Odos S.A.” shareholders guaranteed all loans throughout the entire construction period.

## MAIN BENEFITS

## PROJECT COST & FINANCING

### FINANCING BODIES

- ▶ The Greek State
- ▶ The European Union
- ▶ The European Investment Bank
- ▶ The Concession Company “Attiki Odos S.A.” (through its shareholders)
- ▶ A Group of Commercial Banks

## ENTITIES OF THE PROJECT

### SUPERVISORY AUTHORITY

The GREEK STATE, represented by the DIRECTORATE D17 (OPERATION, MAINTENANCE & EXPLOITATION OF TRANSPORTATION INFRASTRUCTURES WITH CONCESSION AGREEMENTS) attached to the General Secretariat of Infrastructures / General Directorate of Transportation Infrastructures of the Ministry of Infrastructure and Transport, monitors and oversees the operation and maintenance of the motorway.

### CONCESSION COMPANY **ATTIKI ODOS S.A.**

*41.9 km of Attiki Odos Motorway, 190 02 Peania - GREECE, Tel.: +30 210 6682200, Fax: +30 210 6025060, e-mail: aosa@attiki-odos.gr*

“ATTIKI ODOS S.A.” is the company which has undertaken the design, construction, financing, operation and maintenance of the motorway, through the execution of a Concession Contract with the Greek State.

### **ATTIKI ODOS CONSTRUCTION JOINT VENTURE**

*25 Ermou Street, 145 64 Nea Kifissia - GREECE. **Central Work Site:** 41.9 km of Attiki Odos Motorway, 190 02 Peania - GREECE, Tel.: +30 210 6632161, Fax: +30 210 6632694, e-mail: aojv@attikiodos.gr*

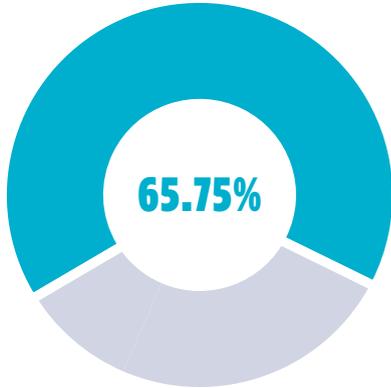

“ATTIKI ODOS JOINT VENTURE” was the construction company for the project, a joint venture consisting exclusively of Greek companies, led by AKTOR S.A., which successfully implemented a complex and difficult project, bringing together the greatest construction companies of Greece.

### OPERATION & MAINTENANCE COMPANY **ATTIKES DIADROMES S.A.**

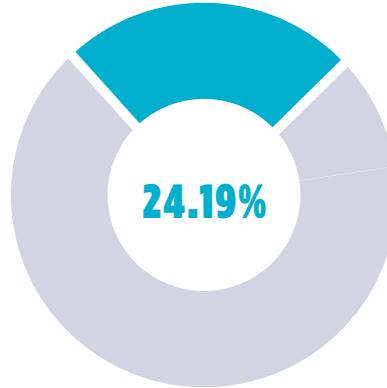

*41.9 km of Attiki Odos Motorway, 190 02 Peania - GREECE, Tel.: +30 210 6682000, Fax: +30 210 6635578, e-mail: ad@attikesdiadromes.gr*

“ATTIKES DIADROMES S.A.” is the company which has undertaken the operation and routine maintenance of Attica Tollway. The companies “ATTIKA DIODIA S.A.” (the shareholders of which are the shareholders of the concession company), with a participation of 80%, and the French company EGIS ROAD OPERATION S.A.” (former Transroute International) with a participation of 20% are the shareholders of “Attikes Diadromes S.A.”.

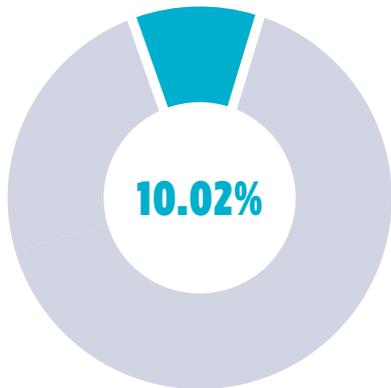

**AKTOR CONCESSIONS S.A.**

S.A.**”

## COVID-19 PANDEMIC

### ATTICA TOLLWAY RESPONDS WITH A PLAN AND PREVENTIVE MEASURES

In 2020, the COVID-19 pandemic left an indelible mark on both Greece and the entire world. In this unprecedented and extremely difficult situation, Attica Tollway took all necessary measures from the very beginning to protect the Health and Safety of its employees and users, while ensuring that it continues to operate smoothly to the maximum. Such effort continued during 2021.

In the context of dealing with the health crisis, the Greek State imposed restrictions on travel that resulted in a significant reduction in traffic on Attica Tollway.

The Emergency Plan, which was developed in 2020 and includes an operational plan and preventive measures, was maintained in order to tackle the crisis of the coronavirus pandemic and is constantly evolving based on new data and the new legal framework.

#### a. Operational Plan

1 Creation of a backup Traffic Management Centre (T.M.C.) that can cover the basic operations of the main Traffic Management Centre, in case the main T.M.C. has to shut down for any reason and any period of time. The backup T.M.C. is located on the ground floor of the Koropi toll station building.

2 Creation of an additional Telephone Customer Service Centre in the Messogia M.S.S., which operates in conjunction with the existing one at the central offices. A complete separation of the employees

working in the two Call Centres is implemented.

3 Teleworking (remote working) of the Telephone Customer Service personnel, with the use of electronic and telephone systems for the uninterrupted operation of the Department 24/7.

4 Teleworking of administration services' personnel.

5 Suspension of operation of the Customer Service Centres during the lockdown period. Subscribers are registered through the telephone and by signing contracts, and e-PASS transponders are sent by courier. To top up their transponders, users are required to use electronic means, not cash.

6 Inducement, through the Variable Message Signs (VMS) at all entrances of the motorway and the electronic signs at the toll stations, for drivers who do not have a transponder and use the manual lanes to make electronic payments or contactless card payments.

7 Teleworking (remote working) programme through remote access from home with the provision of laptops, as well as a mandatory "days off" programme, to ensure social distancing in the workplace. These programmes last one week (depending on the Department) and are constantly updated.

8 Provision of a special purpose leave to those employees who applied for it. Also, temporary suspension from work of employees

identified as belonging to vulnerable groups, as well as pregnant women, in order to protect their health.

- 9 Postponement of the execution by the Construction Joint Venture of non-urgent improvement works and replacements and maintenance works requiring lane closures and special machinery, during the lockdown periods.
- 10 Use of electronic and telephone systems for teleconferences, available to all executives, as well as the possibility for mass text messaging to all staff, to update them immediately in case of emergency, COVID-19 cases among employees, or other work-related emergencies.
- 11 Daily teleconference of the Chief Executive Officer with all the Directors and Heads of Departments, including the Occupational Physician, in order to inform everyone and to formulate the company's operational and maintenance strategy.
- 12 Systematic teleconferences in all Directorates in order to coordinate actions.
- 13 Continuous exchange of information and coordination with the competent Ministry and Egnatia Odos.

## **b. Preventive Measures**

1 Daily contact of Management with the Occupational Physician and the nursing staff of the Occupational Clinic for preventive guidelines against COVID-19.

- 2 Provision of psychological support to employees and their immediate family members through the establishment of a 24-hour Telephone Advice Line.
- 3 Provision of personal protective equipment for the personnel, in accordance with the instructions of the Authorities, in all workplaces.
- 4 Disinfections and meticulous cleaning.
- 5 Installation of protective dividers in 100 toll collector booths.
- 6 Installation of antiseptics per lane and per shift for exclusive use by the toll collectors who deal with customers.
- 7 Reading of toll pass cards, through an extension, so that the customer does not come into contact with the employee.
- 8 Reading of credit / debit cards, through a metal extension where the PIN pad is placed, so that the customer does not come into contact with the employee.
- 9 Prohibition of business trips.
- 10 Restriction of third party visits to companies' premises.
- 11 COVID-19 tests.
- 12 Instructions from the Occupational Clinic in the event that cases are detected, to protect patients and their contacts.

# ATTIKES DIADROMES: OPERATION & MAINTENANCE

14

**“Attikes Diadromes S.A.”** was founded in 1999 and has undertaken the operation and maintenance of Attica Tollway providing high-quality services to the users, 24 hours a day, 7 days a week, all year long.

The daily activities of “Attikes Diadromes S.A.” include the following:

- ▶ Traffic management;
- ▶ Detection, intervention and management of incidents and accidents;
- ▶ Road maintenance (preventive and corrective);
- ▶ Toll collection;
- ▶ Toll policy planning and management of subscription-commercial programmes;
- ▶ The implementation of high value-added actions for all parties involved and in every direction (e.g. information and training on road safety issues).

Please note that since 2014, “Attikes Diadromes S.A.” elaborates Sustainable Development Reports in line with the **Global Reporting Initiative (GRI)**, while from 2018, the Sustainable Development Report also includes the actions of “Attiki Odos S.A.”.

## EMPLOYEES & KNOW-HOW

Being a large-scale project, Attica Tollway created many new jobs during the construction phase and while in operation. For “Attiki Odos S.A.” and “Attikes Diadromes S.A.” the human factor is the most important aspect for the development of the project, as well as for its smooth operation. The continuous development of the personnel remains a constant priority, and the recognition of the contribution of each employee is an essential performance motivator.

The Attica Tollway project engaged, during the construction phase, approximately 5,000 employees of various specialties, from construction workers to senior technical and administrative staff. Following the completion of the construction works and the commencement of the project’s operation, approximately 1,200 new permanent jobs were created, including subcontractors.

The specialised personnel that constantly ensures the optimal operation and maintenance of Attica Tollway is selected on the basis of strict criteria and undergoes continuous training.

The personnel employed in the Patrol and Intervention Teams participate in training sessions in relation to offering first aid, firefighting, providing safety in tunnels and undertake snow removal. The personnel employed in the Toll Plazas, at the Customer Service Centre and in the Telephone Customer Service attend seminars on managing special situations, while all employees are trained on workplace health and safety. Finally, in the course of this pioneering project, both companies have produced highly specialised executives who were later employed, in various senior capacities, in other Motorway projects in Greece.

During 2021, the entire workforce was trained for a total of **11,117 hours** in various matters pertinent to their professional scope, including:

- ▶ Safety at work, fire safety, firefighting and firefighting practices
- ▶ Basic knowledge for dealing with an indoor or vehicle fire
- ▶ Theoretical knowledge on the safe driving programme
- ▶ Crisis management in the time of the COVID-19 pandemic
- ▶ Good customer service practices
- ▶ Certified Sustainability CSR Practitioner Programme
- ▶ Snow removal drills
- ▶ Team building seminar.

In the field of research, Attica Tollway project provides an excellent field for testing new technologies and systems relevant to traffic safety and security issues or matters related to the provision of better services to users, thanks to the motorway quality and its traffic management systems. The operation and maintenance company “Attikes Diadromes S.A.” monitors the technological developments and receives many proposals for collaboration in the framework of Greek and European research programmes, and it has actively participated in several programmes in the past. Please note that, in 2021, five (5) research projects were in progress.

## PARTICIPATION IN RESEARCH PROGRAMMES

# TRAFFIC & **MAINTENANCE**

18

The Attica Tollway Traffic and Maintenance Directorate (TMD) is responsible for the management and maintenance of the motorway and employs **189 highly qualified employees** who ensure smooth traffic on and safe use of the motorway, as well as the appropriate maintenance of the infrastructure. The main duties of the Department include:

- ▶ The traffic flow monitoring;
- ▶ The management of incidents, accidents and planned activities;
- ▶ The inspection, maintenance and repairs, as required, to maintain the motorway in good condition (including the maintenance of the vehicle fleet and all facilities), as well as all routine works, such as the cleaning of the motorway.

The main traffic monitoring centre of the motorway is the **Traffic Management Centre (T.M.C.)**, which is located in Peania and operates on a **24-hour** basis.

Through the constant presence of specialised personnel and the use of high-tech equipment, the T.M.C. continuously monitors the traffic conditions along the entire motorway, is directly informed of the occurrence of any incidents and informs the competent departments, so that they can respond accordingly.

The Media Information Department is also located at the Traffic Management Centre of Attica Tollway. Every day, during business hours or when a notifiable incident occurs, the Media Information Officer communicates directly with television and radio stations in Attica, in order to provide vital traffic information about operations on Attica Tollway.

## TRAFFIC MONITORING

## MOTORWAY EQUIPMENT

Attica Tollway features a high-quality skid-resistant asphalt pavement and it is protected by fencing along its entire length. Pedestrians can only cross the motorway using designated overpasses and underpasses, while there are special detectors embedded in the pavement, which enable the monitoring of incidents that affect the smooth operation of the motorway (e.g. stranded vehicles). Special care has been given to providing sufficient and effective lighting along the motorway. At the access points of the motorway and along its length, electronic variable message signs have been installed to inform the motorists about prevailing motorway conditions.

The equipment on the motorway includes closed-circuit TV cameras, variable message signs, inductive loops, variable speed limit signs, meteorological stations and over-height vehicle detectors. The T.M.C.'s equipment includes a video wall, consisting of 8 "natural cubes" of 70 inches and 8 workstations. Moreover, air pollution is monitored regularly through 8 stations, which are installed at key points along the motorway.

## TUNNEL EQUIPMENT

There are 56 tunnels and cut & cover sections on Attica Tollway, extending along 12.6 km, passing mainly through urban areas. To secure road safety of the users in these sections, Attica Tollway has adopted a series of special regulations and procedures in order, on the one hand to optimise prevention, and on the other hand to detect and manage incidents as quickly and efficiently as possible. Indicatively: creation of traffic management action plans, always in cooperation with the Competent Authorities, regular personnel training through drills and incident simulations, as well as continuous maintenance and upgrade of all systems and equipment.

The tunnels include:

- ▶ Emergency Road Telephones (ERT), located every 50 m inside the tunnels and at the entrances / exits;
- ▶ Closed Circuit TV (CCTV) - every 125 m and at the entrances / exits;
- ▶ Traffic Measurement Sensors (inductive loops) - every 60 m;
- ▶ Lane Control Signs (LCS) - every 150 m. Double-faced signs bearing a green arrow / red "X", inside tunnels;
- ▶ Variable Speed Limit Signs (VSLS) - every 150 m;
- ▶ Over-height Vehicle Detectors (OHVD) at all entrance points (5 m);
- ▶ FS - fire stations equipped with two fire extinguishers and an Emergency Road Telephone (ERT) every 50 m on the left side;
- ▶ FC - fire-fighting cabinets, equipped with a hose, a foam generator and two dry powder fire extinguishers, installed every 50 m on the right side;
- ▶ Fire-fighting network;
- ▶ Ventilation fans;
- ▶ CO and visibility detectors;
- ▶ Specialised photometers.

## VEHICLE FLEET

The company's vehicle fleet includes vans appropriately equipped for intervention purposes in the event of incidents and for the execution of routine maintenance works, mini vans for the maintenance of the electromechanical equipment, cranes, pick-up vehicles, passenger vehicles and motorcycles. "Attikes Diadromes S.A." provides free of charge road assistance to the Attica Tollway users, through partnership with roadside assistance companies, the services of which are available on a 24-hour basis. Furthermore, the company possesses UNIMOG trucks of multiple functions, which are fitted with the appropriate equipment (blade, salt spreader), which can also operate as snow-ploughing machines, washing vehicles, sweepers (brushes), elevator bucket trucks and loaders.

## ATTICA TOLLWAY TRAFFIC DATA\*

The number of vehicle entries on Attica Tollway decreased in 2021 compared to 2019 by **11%** while compared to 2020 there is an increase in the congested traffic sections by **14%** on weekdays and by **17%** on holidays. In particular, **76,800,720** vehicle entries were recorded, corresponding to an average of **210,413** daily vehicle entries. July was the busiest month, with a daily average of **263,710** entries.

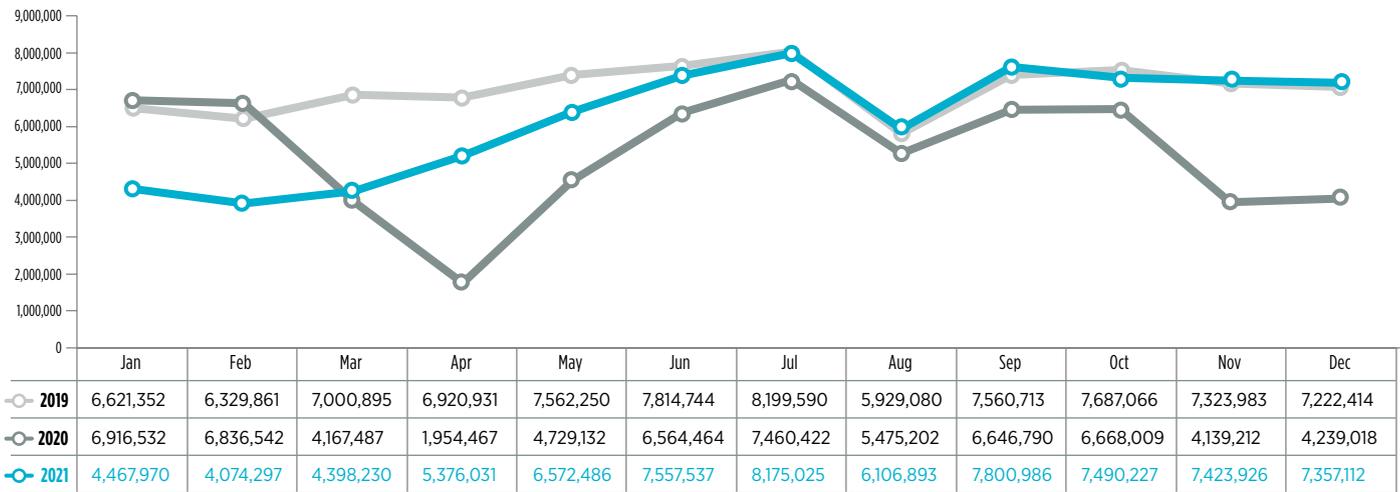

During 2021, the users of Attica Tollway covered **1,243,639,889** km in total, while the heaviest traffic was reported in the sections between exits for Athens - Lamia National Highway (Metamorfossi) and D. Plakentias interchanges. The following chart and diagrams provide a summary description of the total traffic in Attica Tollway in 2021.

Change in Average Daily Traffic in Attica Tollway (2021 vs 2019)	<b>-11%</b>
Change in Average Daily Traffic in Attica Tollway (2021 vs 2020)	<b>+17%</b>

(\*) The rate of change of traffic is rounded for the needs of this annual report.

	Vehicle kilometres travelled (total for 2021)	<b>1,243,639,889</b>
	Average distance covered per trip	<b>16.2 km</b>
Section with the heaviest traffic: Metamorfossi (I/C 8) - D. Plakentias (I/C 13)	Average daily traffic – working days (vehicles)	<b>63,000</b>
	Average daily traffic – weekends & holidays (vehicles)	<b>42,500</b>
	Rush hour traffic on working days 08:00-09:00	<b>4,400 - 5,700</b>

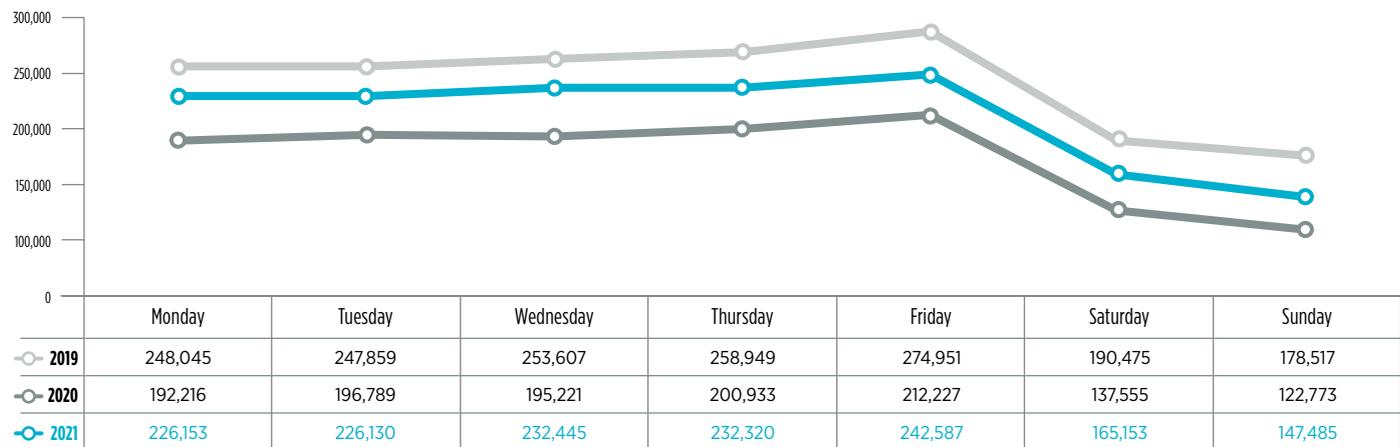

## TOTAL VEHICLE ENTRIES PER MONTH (2019-2021)

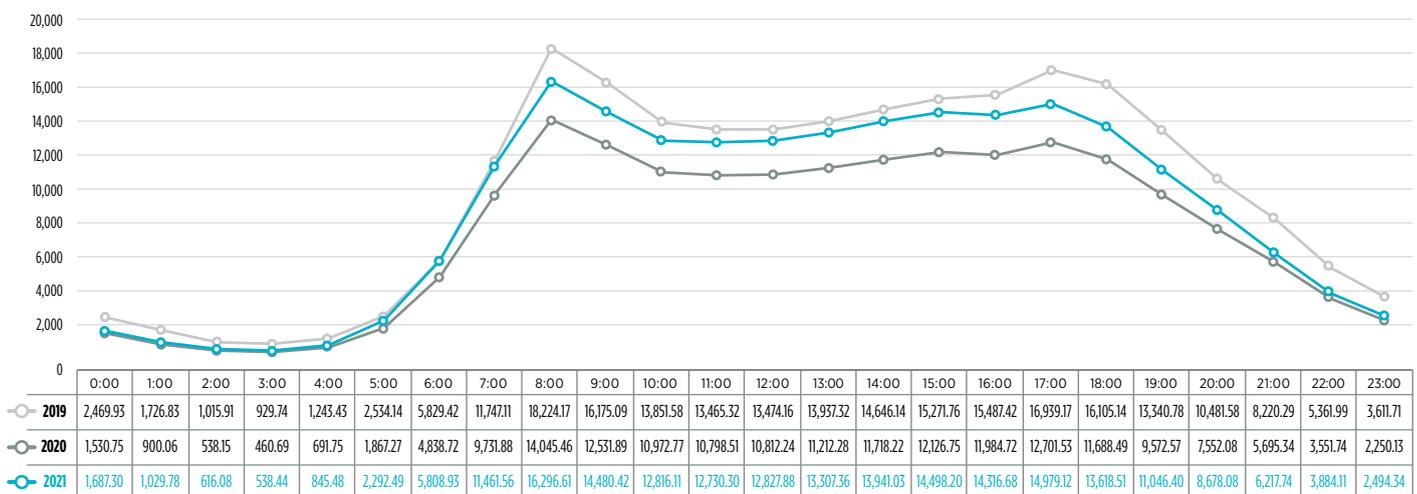

## DAILY AND HOURLY FLUCTUATION

Traffic on Attica Tollway during the week is clearly heavier than during the weekends, Friday being the day with the heaviest traffic. More specifically, on Fridays, traffic reaches **105%** as compared to average traffic on the rest of the weekday business days.

## AVERAGE DAILY TRAFFIC (VEHICLE ENTRIES) PER DAY (2019-2021)

## DISTRIBUTION OF AVERAGE DAILY TRAFFIC (VEHICLE ENTRIES) PER HOUR (2019-2021)

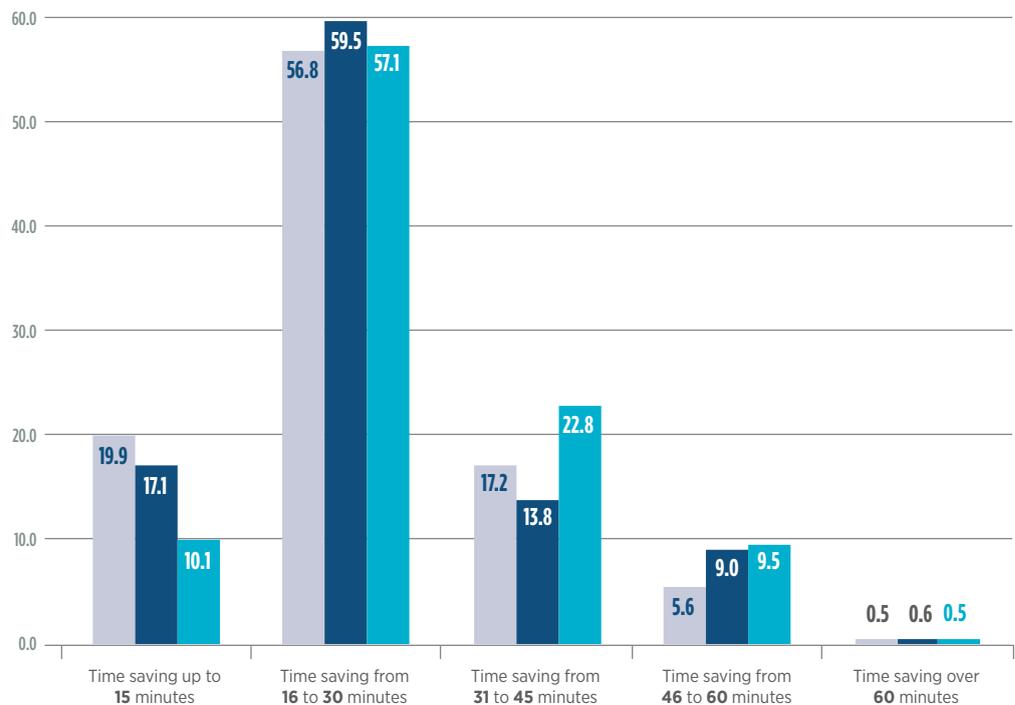

## TRAVEL TIME SAVINGS WHEN USING ATTICA TOLLWAY

According to a survey conducted by Invision/Metron Analysis in 2019\*, Attica Tollway users save **31 minutes** on average per trip, while **89.3%** of the users state that they save from fifteen minutes to an hour.

*\* In 2021, as in 2020, due to the exceptional circumstances created by the COVID-19 pandemic, the relevant survey was not carried out.*

### USER PERCEPTION REGARDING TIME SAVINGS FROM USE OF THE MOTORWAY (%)

Traffic management constitutes a responsibility of the utmost importance for the staff of the operation and maintenance company, i.e. “Attikes Diadromes S.A.”. The company’s tasks include the following:

- 1 Continuous monitoring of the network and incident detection by specialised personnel, using the appropriate technological, on a 24-hour basis;
- 2 Mobilisation and notification of the competent authorities and support to their work;
- 3 Preliminary protection measures at the location of the incident;
- 4 Resolving, by own means, simple daily events before they evolve into traffic problems;
- 5 Availability of human and material resources, as well as specialised technical support for special types of incidents (machinery, snow-ploughing vehicles, cranes etc.);
- 6 Central coordination and provision of information to all parties involved through the Traffic Management Centre (T.M.C.), which operates as an information collection and diffusion hub.

The T.M.C. is informed of the traffic conditions and any incidents through:

- 1 The patrol vehicles, moving along the entire length of the Tollway, on a **24-hour** basis, so that the Patrol Employees can detect any incidents that may have occurred and promptly intervene by providing assistance free of charge;
- 2 The designated four-digit telephone number **1024**, which users may dial from their mobile phones;
- 3 The Emergency Road Telephones, located every 50 m inside the tunnels and every 2 km on the open motorway;
- 4 The technologically advanced equipment, such as Closed Circuit TV (CCTV) and inductive loops placed under the road surface.

## INCIDENT MANAGEMENT

*The T.M.C. and the support mechanism of the Patrol Employees and Intervention Teams have completed **21 years** of operation and, during this period, they have carried out more than **476,022** interventions to incidents on the motorway.*

The T.M.C., based on the information collected and in order to ensure the motorway's smooth operation, promptly launches the necessary procedures as follows:

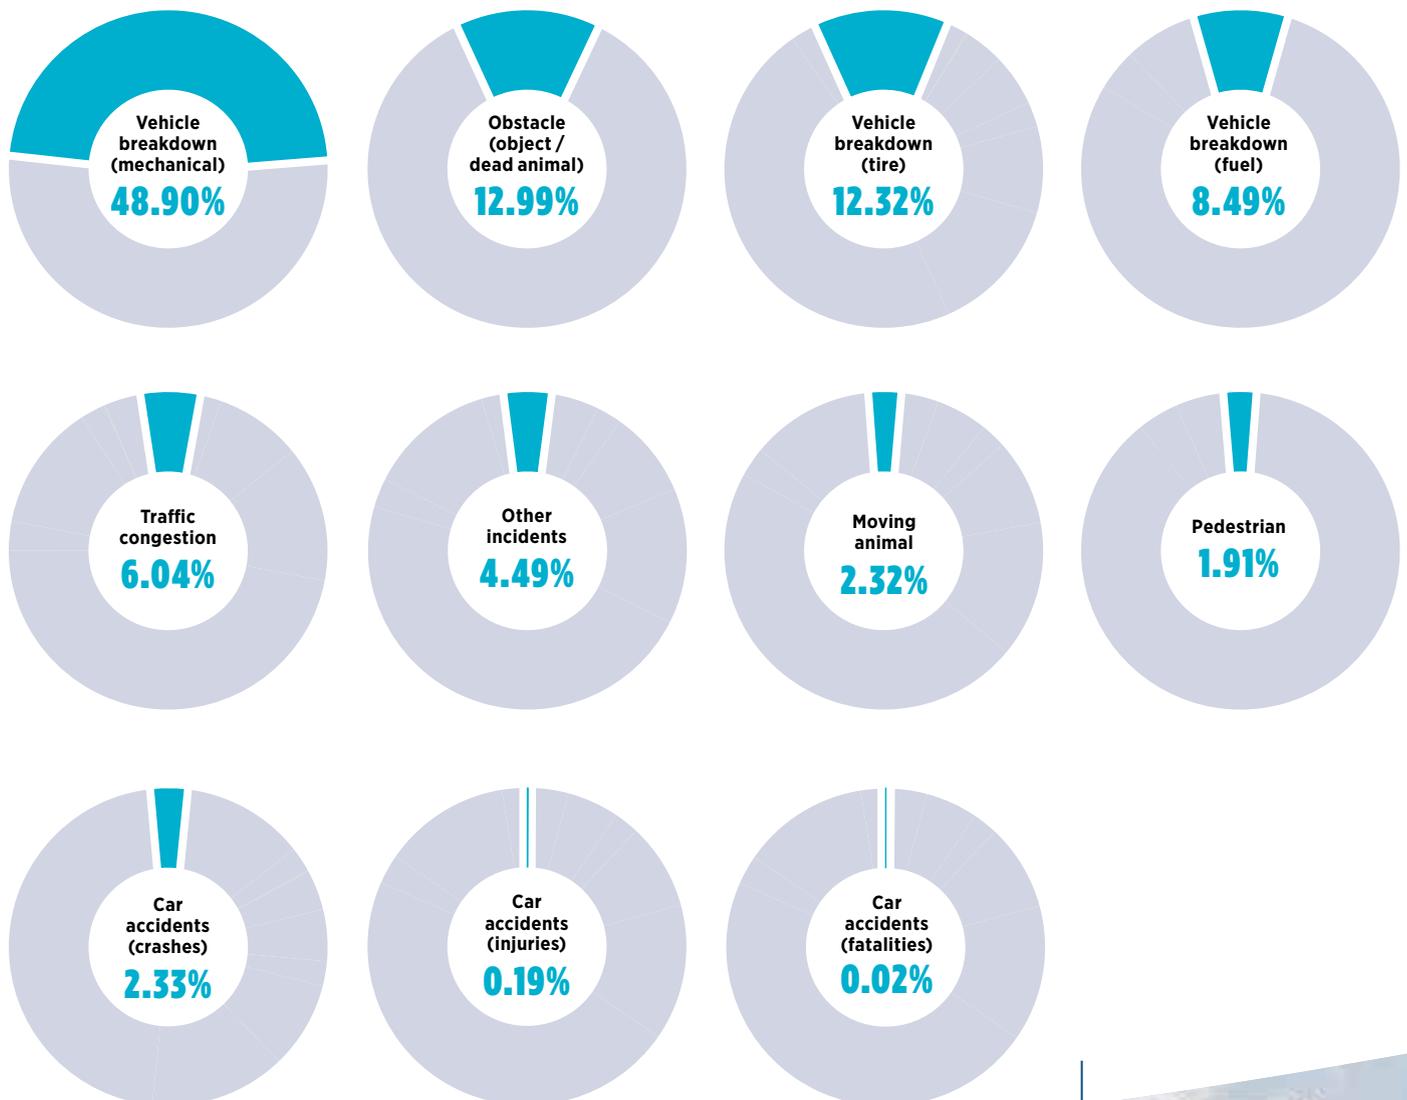

- ▶ Communicates constantly with the patrol units that drive along the motorway and whose main task is to detect any emergency incidents and promptly intervene and restore traffic conditions;
- ▶ Notifies drivers of any problems they may encounter along their journey through the Electronic Variable Message Signs, which are located at the entrance points, as well as along the length of the motorway;
- ▶ Informs the Vehicle Recovery Units that operate under the control of the roadside assistance company, as well as the Heavy Vehicles Road Assistance Unit (HVRA). Both units intervene in cases of immobilised vehicles and transfer them to the nearest motorway exit, free of charge. In this way, assistance is immediately provided to the drivers of the immobilised vehicles and the consequences on the traffic flow of the motorway are minimised;
- ▶ Informs, as required, the competent Traffic Police Department, the National Emergency Aid Centre and the Fire Brigade, in order for them to intervene within the framework of their competence, for the safe operation of the motorway;
- ▶ Coordinates the works which are executed on a daily basis by the maintenance-intervention teams.

In 2021, the personnel of the operation and maintenance company “Attikes Diadromes S.A.” handled **23,326 incidents**, namely an average of about 64 incidents per day.

The average time required to efficiently handle such incidents is on average **24.43 minutes** (time spent on location to resolve/clear incident), while, as shown in the following diagram, most incidents involved vehicle breakdowns (fuel and mechanical problems).

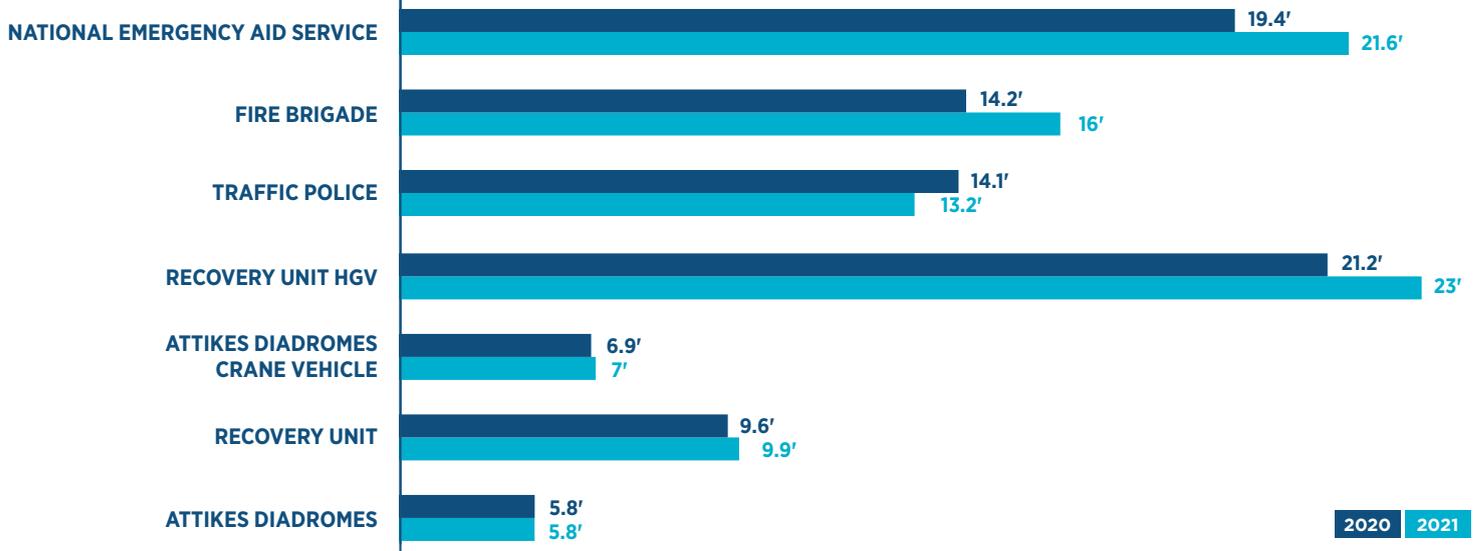

## INCIDENTS PER TYPE (% , 2021)

## RESPONSE TIMES

In 2021, the average response time of the operation and maintenance company, "Attikes Diadromes S.A.", to incidents was **5.8 minutes**. This time frame is much less than the response time of all the other competent, state or not, Authorities intervening in Attica Tollway.

# ROAD SAFETY STATISTICS

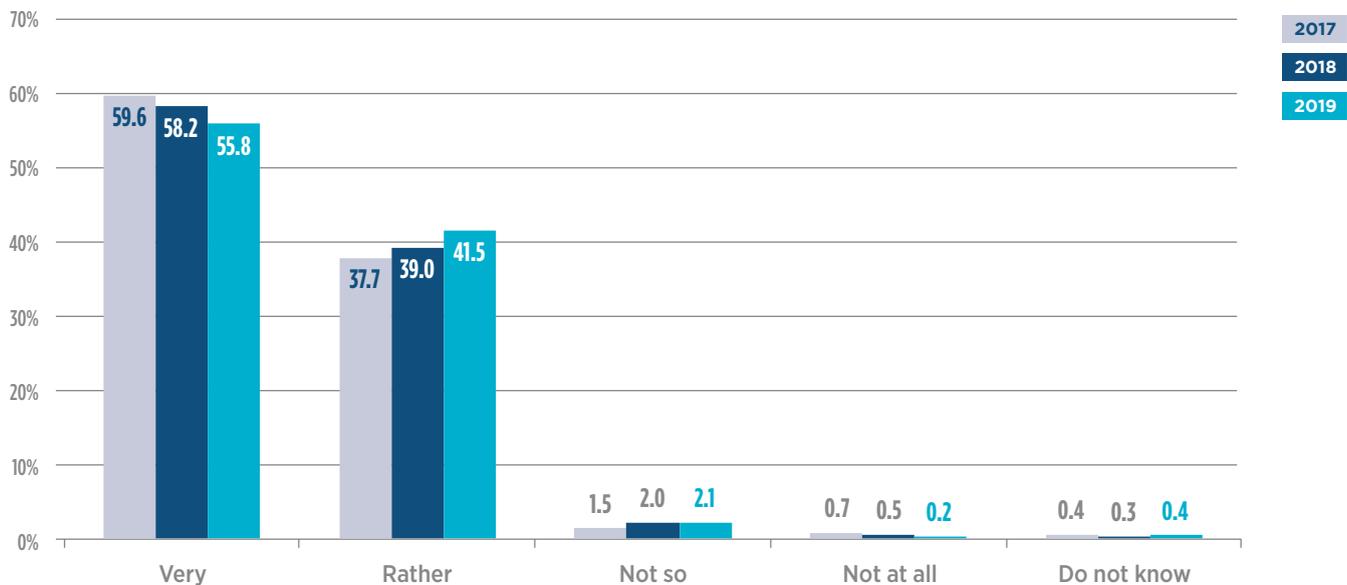

Although, according to the relevant statistics, the rate of fatal road accidents is high in Greece, Attica Tollway is listed as one of the statistically safest roads in Europe.

The quality and excellent maintenance of the infrastructure, in conjunction with the high level of services provided, are confirmed and appreciated by the motorway users. The Invision/Metron Analysis survey conducted on behalf of Attica Tollway in 2019\*, showed that **97.3%** of the users feel safe when driving on the motorway.

## USERS' FEELING OF SAFETY

### USERS' FEELING OF SAFETY WHEN DRIVING ON ATTICA TOLLWAY (%)

\* In 2021, as in 2020, due to the exceptional circumstances created by the COVID-19 pandemic, the relevant survey was not carried out.

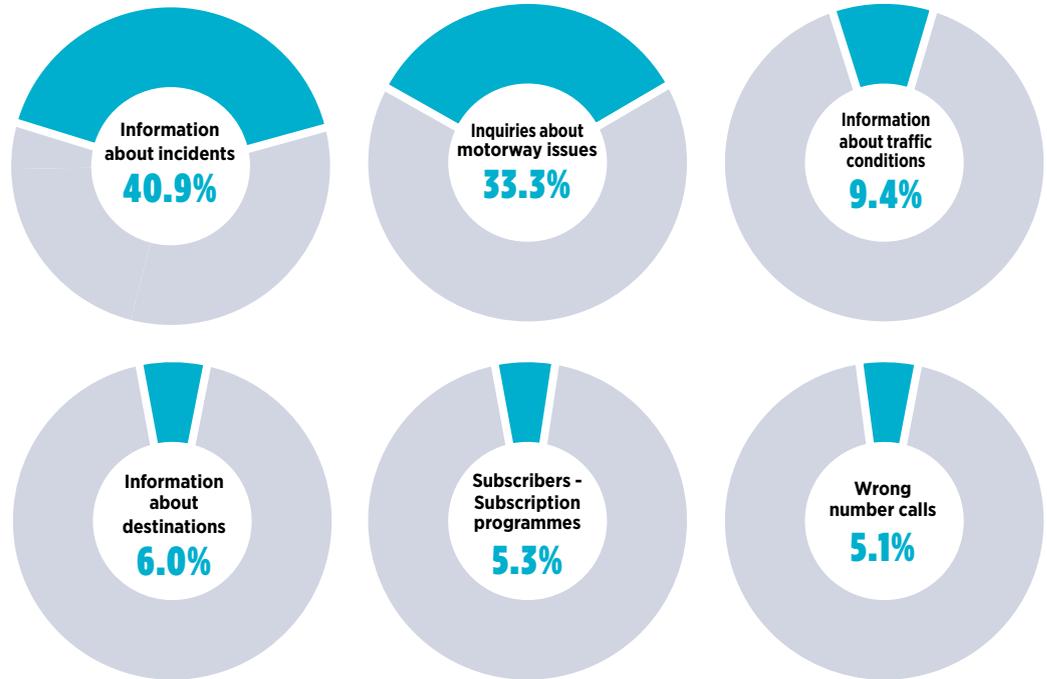

In 2021 the call centre for the Emergency Telephone Number **1024** received approximately **110 calls** on a daily basis from Attica Tollway users, who either required assistance or wished to report problems they encountered on the motorway. Many users also made inquiries about entry – exit interchanges, the shortest route to their destination, etc.

During 2021, **39,994 calls** were received. As shown in the graph below, out of the total number of calls, **40.9%** were made to notify about an incident having occurred, **33.3%** to ask about various motorway issues, **6%** to ask about destinations and **9.4%** to ask about traffic conditions. Of the total number of emergency calls received by the line in 2021, **62%** were answered in just **15"**, thus attaining the long-term goal of responding to all issues immediately.

## EMERGENCY TELEPHONE NUMBER 1024

## ALLOCATION OF “1024” CALLS, BASED ON INFORMATION TYPE

Average number of calls to 1024: **110**

## MAINTENANCE

In Attica Tollway, maintenance works are a primary concern and an integral part of the daily activities on the motorway and are divided into two main categories:

- ▶ Preventive maintenance, with regular inspections and continuous works
- ▶ Corrective maintenance, with ad hoc inspections and reconstructions.

During 2021, **375,905 working hours** were spent on maintenance works (preventive and corrective works) (**120,774** working hours for Civil Engineer works and road maintenance, **132,315** working hours for the maintenance of electrical & electromechanical equipment and **122,816** working hours for landscaping).

## LANDSCAPING

To maintain and expand the green areas of the motorway, specialised personnel is employed on a permanent basis. A green motorway such as Attica Tollway requires daily care with works that include **pruning, planting, grass cleaning, rubbish collection, plant disease monitoring, fertilising, spraying** and **watering**. Water for irrigation is supplied by borehole drilling regulated by a central electronic system, depending on the weather conditions, in order to reduce water consumption. For the irrigation of specially adapted grassed areas, water from the biological wastewater treatment plants of Attica Tollway is used, in order to prevent the exhaustion of the natural water resources. At the same time, the Greenery Maintenance Department applies a very rigorous programme of equipment recycling.

## DURING 2021

- ▶ **800,000** trees and bushes and **78,000 m<sup>2</sup>** of lawn were maintained.
- ▶ For the plants in question to grow properly, **20,600 kg** of inorganic fertilisers were used, as well as extremely small —considering the size of the project— quantities of pesticide (10 kg for biological control and 11.1 litres for chemical control), biological control (cutting and burning) always being a priority.

The goal of environmental protection being the driving force, the implementation of appropriate methods in this direction continued successfully through:

- ▶ the use of multi-purpose bags instead of plastic bags during the collection of plant residues and waste from the slopes;
- ▶ the transformation of the plant residues from pruning into sawdust. More precisely, from the products of plant pruning and cutting, a total of **12,638** cubic meters of sawdust was produced (using pruners, special machines for this purpose), which was then used as organic fertiliser, for soil cover as well as for the production of compost;
- ▶ the management of irrigation water to save as much as possible. In particular, regarding specific plants (mainly big trees), the amount of water used was reduced to a minimum, since the root system had expanded and therefore the trees do not require frequent watering.

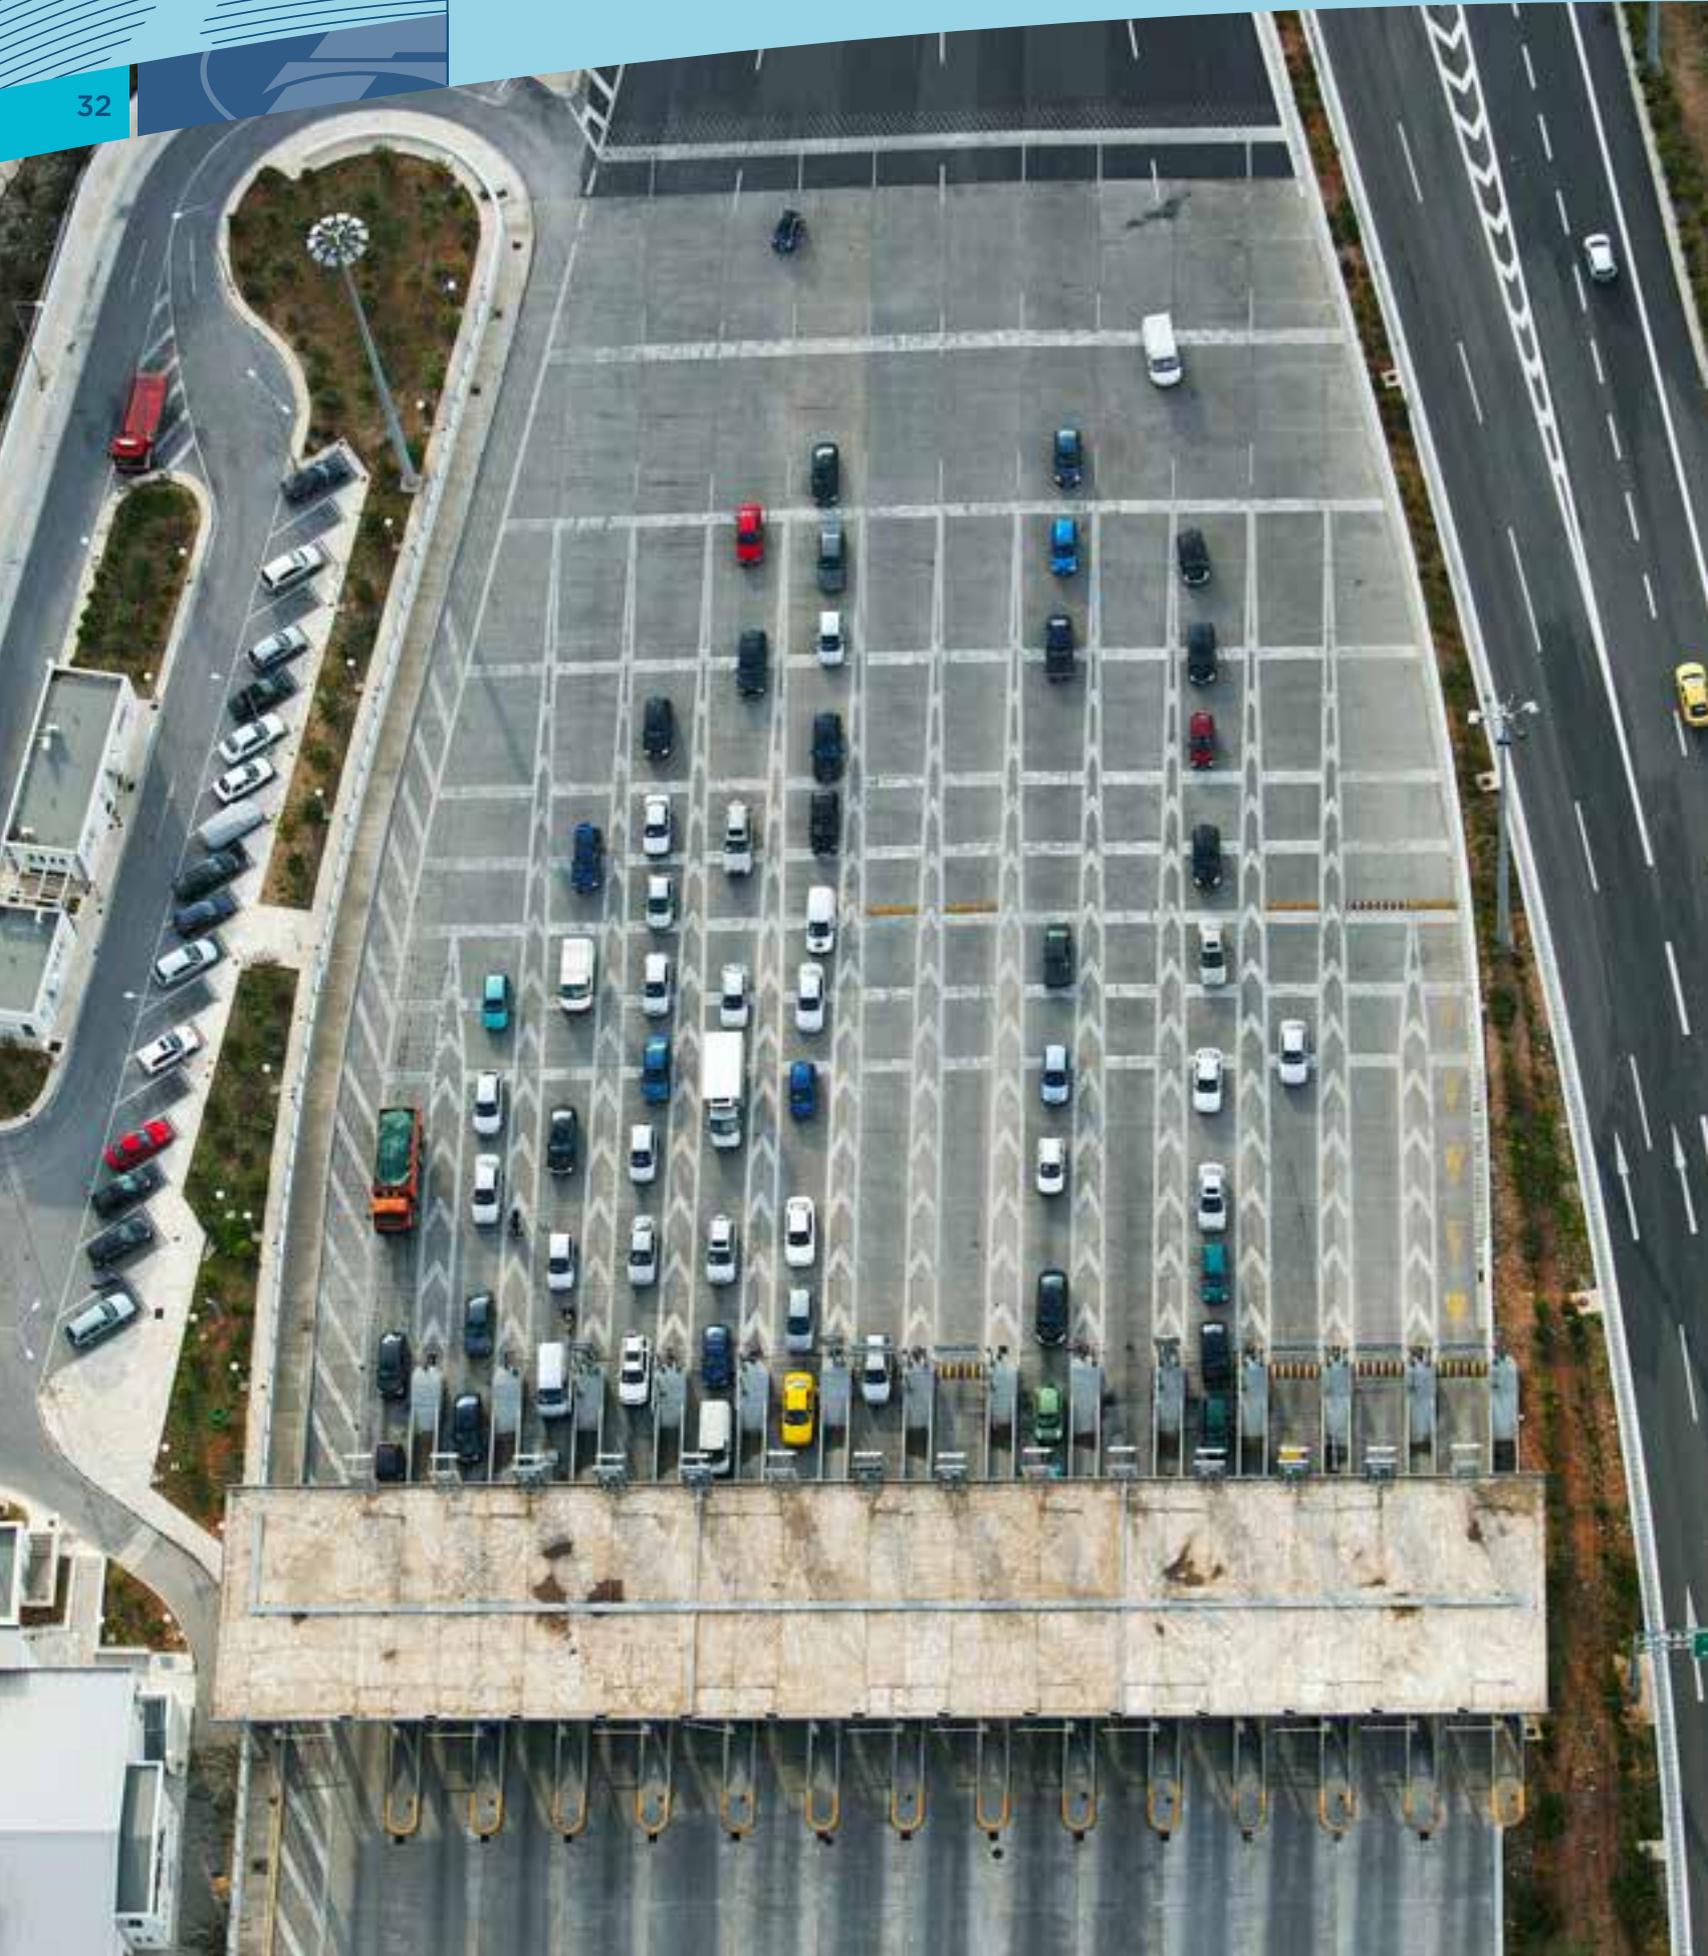

## NOISE MONITORING

In order to constantly monitor the levels of noise pollution, **8 automatic air quality and noise measurement stations** operate at key locations on Attica Tollway. In addition, noise measures are implemented so as to reduce noise levels in the Attica region, in conjunction with land configuration and the needs of each area.

*During 2021, **127 24-hour measurements** were conducted by mobile noise measurement units. Based on the results of the measurements, no additional noise barriers were installed.*

# TOLLS & COMMERCIAL POLICY

The planning of the commercial policy and the management of the commercial programmes, the operation and the collection of tolls from the motorway stations, the operation of the Customer Service Centres in Attica Tollway and Moreas Motorway, as well as the management of all issues concerning subscribers through the Telephone Customer Service, compose a wide range of activities developed by the Attica Tollway Directorate of Tolls, Commercial Management and Telephone Customer Service.

## TOLL COLLECTION

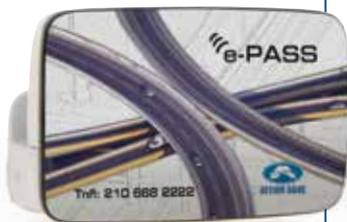

In Attica Tollway, all toll booths are located at the motorway's entrance points, in specially configured layouts. Therefore users pay tolls only once, upon entering the motorway. The toll system used is open, with a flat toll rate for all trips. In this way short journeys are avoided, and the Tollway absorbs a large proportion of the through traffic, accomplishing therefore the objectives that were set before the construction of the project by the then Hellenic Ministry for the Environment, Physical Planning and Public Works. In total, there are **39** toll stations with **195** toll lanes (gates).

The Toll Department employs **591** employees serving Attica Tollway. At the same time, **763 additional employees** are deployed throughout the toll stations of Egnatia Odos Motorway in Northern Greece.

LANES	CAPACITY	TOLL LANES
Operation with Toll Collectors	300 vehicles/hour	from 99 to 156
Operation with e-PASS	840 vehicles/hour	from 39 to 96

## The toll rates depend on the vehicle categories:

CAT.	INDICATIVE ILLUSTRATION	DESCRIPTION OF VEHICLE CATEGORY <small>(according to the Concession Contract / Law 2445/96)</small>
1		Motorbikes and two-wheel motorcycles, one wheel per axle.
2		Private use passenger cars, including passenger cars with a small trailer and rack. Their height should not exceed 1.30 m high over the first axle of two axles, or over 1.30 m high over the third axle.
3		Light commercial vehicles more than 1.30 m high over the first axle and total height 2.70 m.
4		Cars with trailers up to 1.30 m high over the first axle and over 1.30 m high over 3 axles, as well as vans (under 15 seats).
5		Small and medium trucks with a total height over 2.70 m, with 2 or 3 axles and large buses (over 15 seats).
6		Large trucks, with a total height over 2.70 m, with 4 axles or more.

Attica Tollway was the first company in Greece to introduce the use of the electronic device **e-PASS**, which enables drivers to pass through the electronic toll lanes at the toll plazas quickly and easy, avoiding the cash payment process. After subscribing to a programme, the motorway users receive the e-PASS device, saving time and money. For motorcycle or truck drivers\*, the use of special Account Cards is provided for safety reasons.

*\* provided that the interoperable road network is used, the use of e-PASS device is possible on other motorways.*

## SUBSCRIBERS & PROGRAMMES

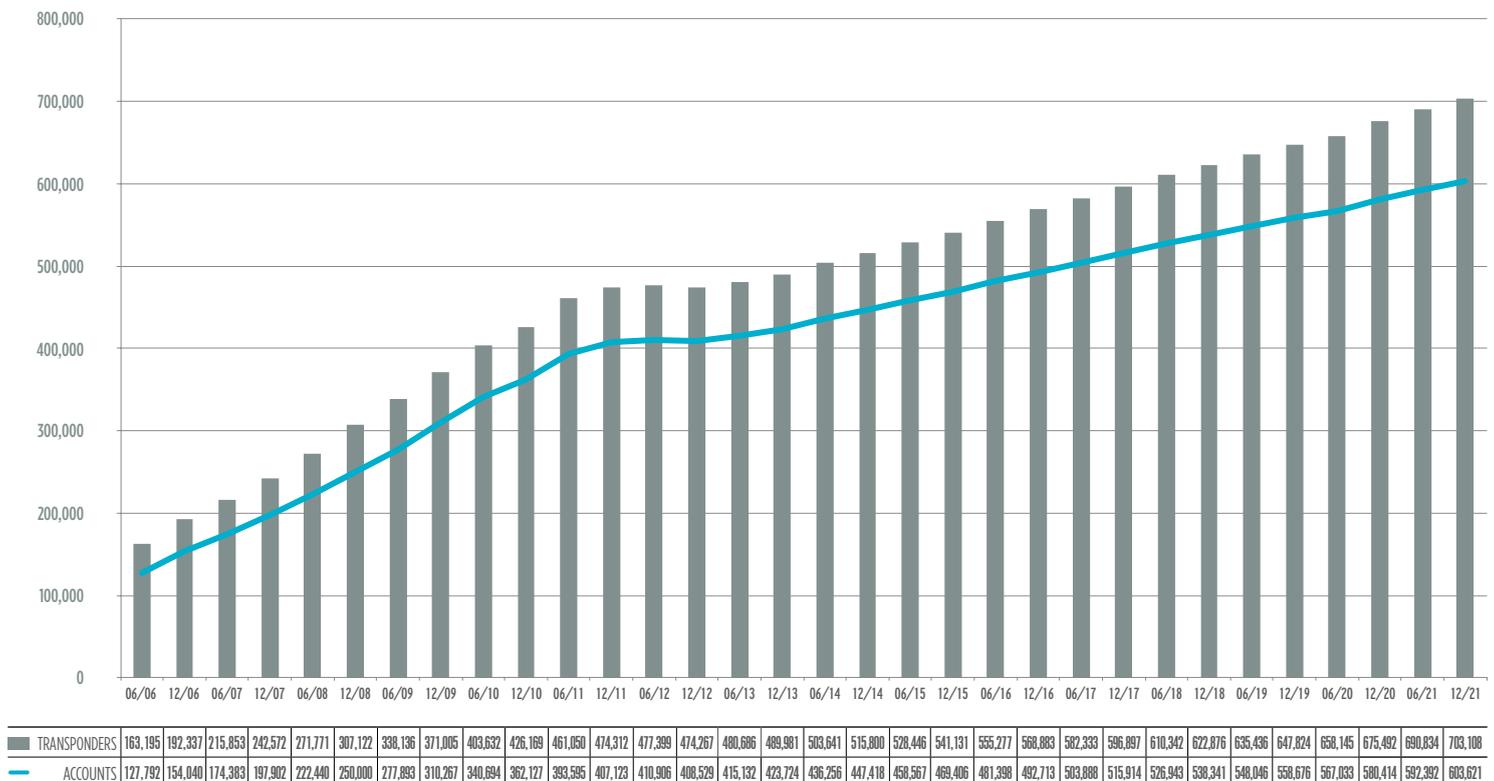

The seven (7) different subscription programmes (EXPRESS, BONUS, FRIENDLY, MOTO, BUSINESS, EXPRESS TRUCK, FRIENDLY TRUCK) offered by Attica Tollway meet the needs of all drivers, since they are differentiated by the type of vehicle, frequency of motorway use and method of payment (pre-payment – post-payment).

Attica Tollway has an extensive e-PASS electronic device distribution network which among other things includes the 13 Customer Service Centres. It also offers a variety of ways to renew/top up the subscription accounts: through telephone communication with the Telephone Customer Service, through the my e-PASS service or the my e-PASS application for mobile phones, but also through the network of cooperating banks and companies (detailed information at [www.aodos.gr](http://www.aodos.gr)).

The efficient design of the Attica Tollway subscription programmes and the adopted pricing policy gained the interest of the motorway users from the very beginning. As shown in the following diagram, from the first day of operation of Attica Tollway up to the present day, the subscription rate of the company has showed a rapid growth rate.

By the end of 2021, **703,108** e-PASS electronic devices (transponders) were provided to **603,621** subscribers.

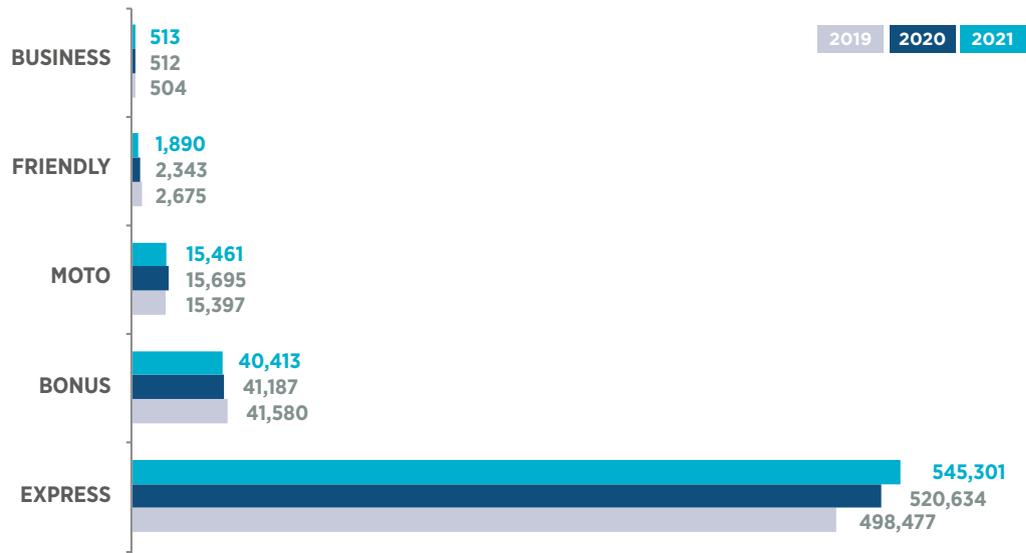

## ACCOUNTS & TRANSPONDERS

## EVOLUTION OF SUBSCRIPTION PROGRAMMES (2019-2021)

As shown in the diagram below, EXPRESS has proved to be by far the most popular subscription programme. For the last three years, there has been a subscribers' increase of **9.4%**.

The continuous increase of Attica Tollway subscribers resulted in the increase of electronic transactions. As shown in the following graph, in 2021, electronic transactions represented **55.77%** (compared to 55.03% in 2020) of the total, while the rate of e-PASS users was **59.92%** in March 2021.

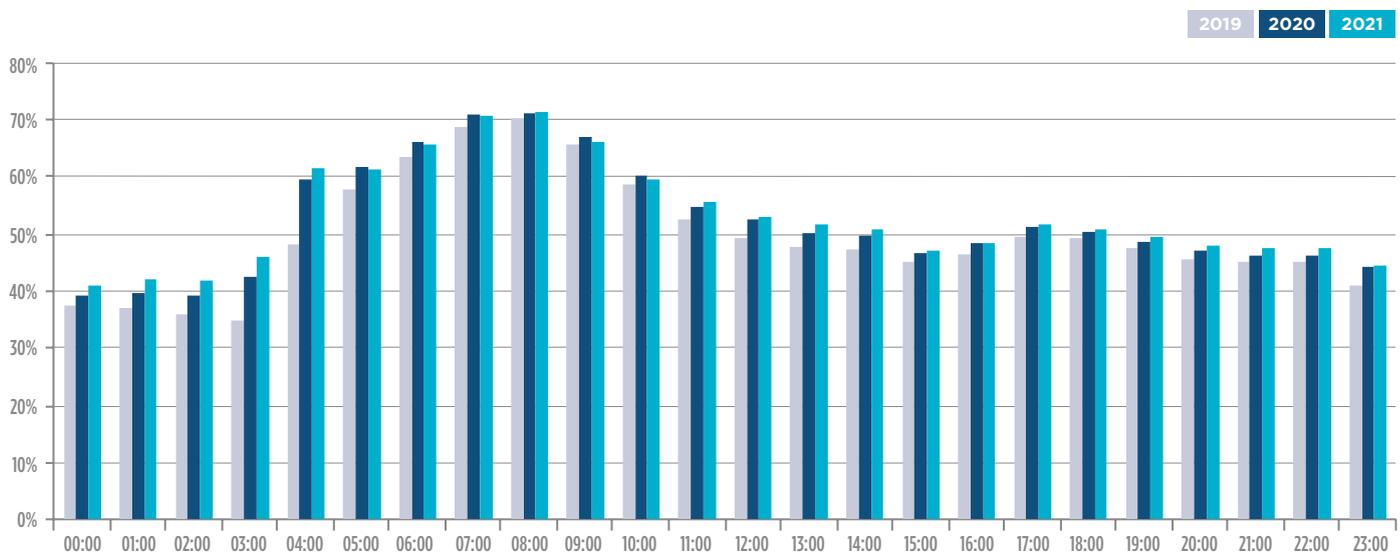

## EVOLUTION OF TRANSACTIONS (2019-2021)

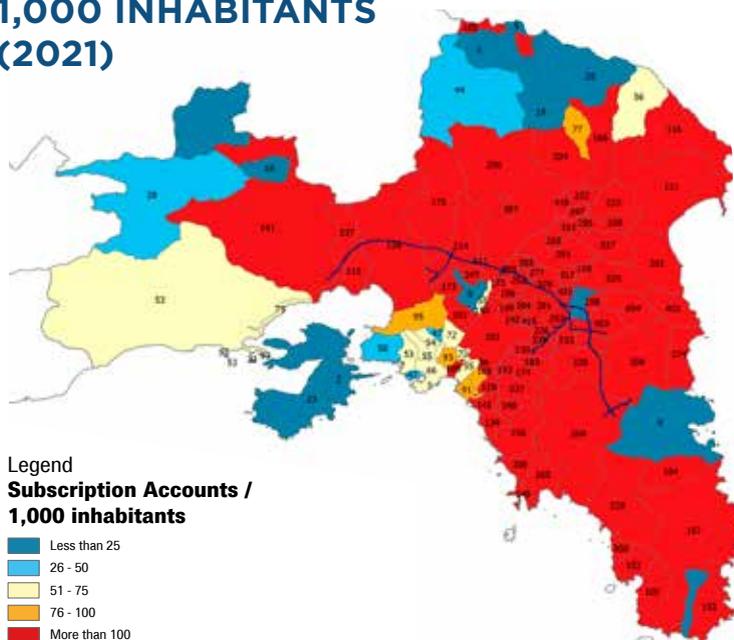

► In some cases, during rush hours, electronic transactions reached **71.3%** of the total transactions. For example, as shown in the following diagram, at the Penteli Toll Station towards Elefsina, between 7 and 9 am, the electronic transactions represented from **66.1%** up to **71.3%** of the total transactions (the increased number of electronic transactions at this station is proportional to the increase in traffic).

## HOURLY ELECTRONIC TRANSACTIONS VOLUME AT THE PENTELEI TOLL STATION (% , 2019-2021)

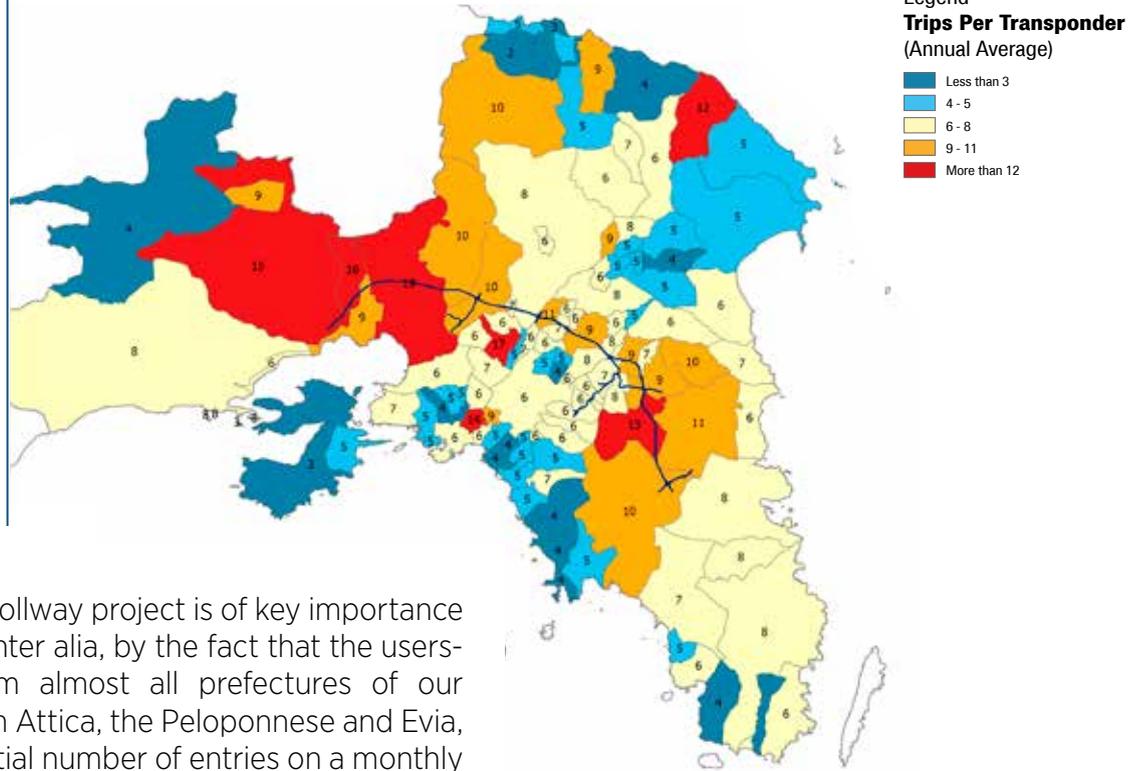

## e-PASS SUBSCRIBERS IN ATTICA PREFECTURE, PER 1,000 INHABITANTS (2021)

Currently, Attica Tollway serves all transport routes in Attica and, as the map on the right shows, it is clear that motorway subscribers come from all suburbs of Attica, but mainly from the north - eastern suburbs. At the same time, the number of subscriber journeys per month is also notable.

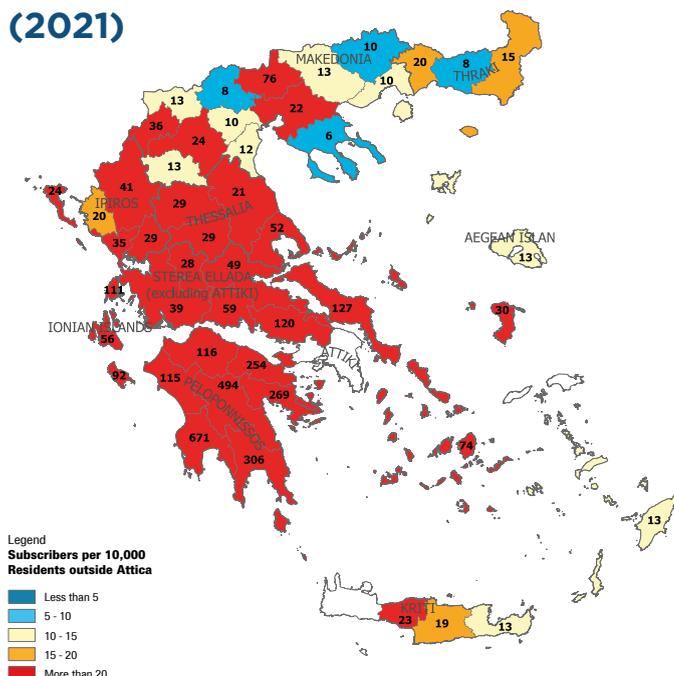

## AVERAGE MONTHLY e-PASS USE IN THE PREFECTURE OF ATTICA PER MUNICIPALITY (2021)

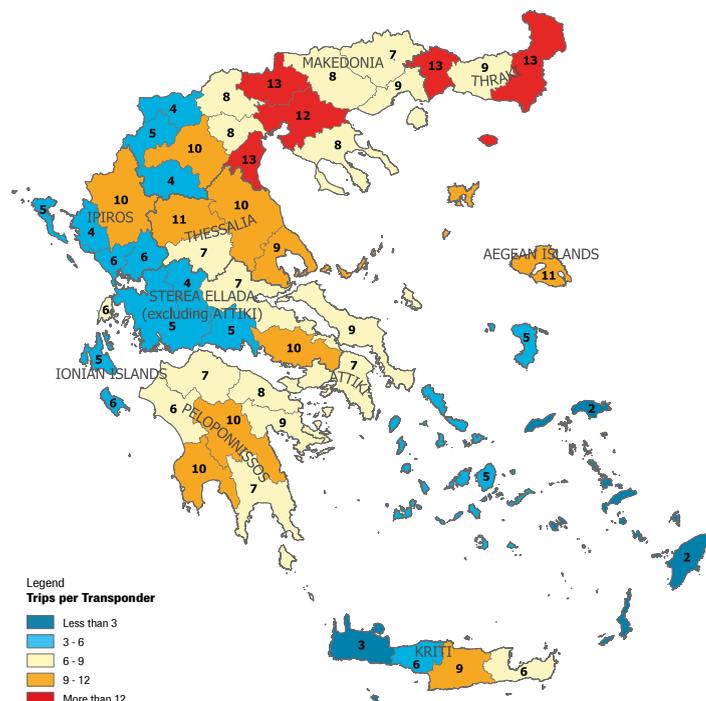

In addition, the Attica Tollway project is of key importance and this is confirmed, inter alia, by the fact that the users-subscribers come from almost all prefectures of our country, especially from Attica, the Peloponnese and Evia, representing a substantial number of entries on a monthly basis.

## e-PASS SUBSCRIBERS IN GREECE, PER PREFECTURE, PER 10,000 INHABITANTS - ATTICA IS EXCLUDED (2021)

## AVERAGE MONTHLY e-PASS USE, PER PREFECTURE IN GREECE (2021)

## INTEROPERABILITY

Back in 2008, Attica Tollway was the first company in Greece to implement e-PASS interoperability (**Greek Interoperable Tolling Systems - GRITS**), i.e. the ability to use the e-PASS in other toll operated motorways in Greece. What is more, as of November 2020 users have been able to travel with the Attica Tollway e-PASS all over the country, as now the interoperable road network includes all the highways of Greece:

- ▶ The **Moreas Motorway** (Korinthos-Tripoli- Kalamata Motorway and Lefktro - Sparti branch);
- ▶ The **Olympia Odos Motorway** (National Road of Elefsina - Korinthos - Patra);
- ▶ The **Rio-Antirion Bridge**;
- ▶ The **Aegean Motorway** (National Road of Athens - Thessaloniki, Maliakos - Kleidi Section);
- ▶ The **Nea Odos** (Antirio to Ioannina, A.TH.E from Metamorfossi I/C to Skarfia, Prefecture of Fthiotida and P.A.TH.E. from Schimatari - Chalkida);
- ▶ The **Kentriki Odos** (A.TH.E. from Thermopiles to Egnatia Odos and A.TH.E. from Skarfia to Raches of Fthiotida);
- ▶ The **Egnatia Odos**.

# CUSTOMER SERVICE

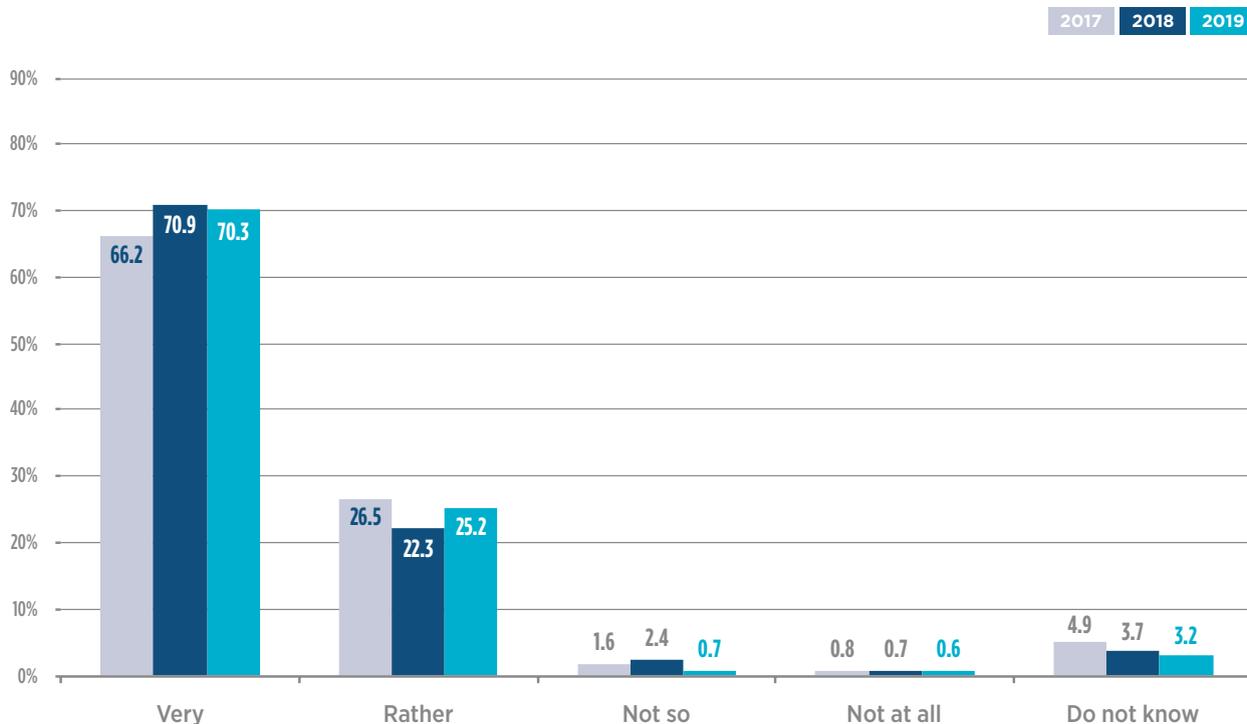

## TELEPHONE CUSTOMER SERVICE CENTRE (T.C.S.)

The Telephone Customer Service (T.C.S.) can be reached by dialing **+30 210 668 2222**; it receives **1,370** calls on average on a daily basis, while it handles emergencies in collaboration with the Traffic Management Centre. This highly efficient service has won the trust of its users, who increasingly refer to the Telephone Service for their queries.

In 2021, the T.C.S. received **356,393** calls, with issues resolved within approximately **1' 46"**, dealing with **678,037** issues, while **12,877** outgoing calls were made. Moreover, the T.C.S. representatives replied to **57,437** requests by subscribers and users which were sent by e-mail. During this period and in accordance with the following diagram, the degree of satisfaction of the users based on the service level and staff contact at the T.C.S. exceeded **95.5%** during 2019\*.

*\* In 2021, as in 2020, due to the exceptional circumstances created by the COVID-19 pandemic, the relevant survey was not carried out.*

### DEGREE OF SATISFACTION WITH THE SERVICE AND THE CONDUCT OF THE TELEPHONE CUSTOMER SERVICE DEPARTMENT EMPLOYEES (%)

## CORPORATE WEBSITE

The company's website ([www.aodos.gr](http://www.aodos.gr)) includes all information in relation to the project, the motorway operation, traffic information, etc. Moreover, thanks to the web service "**my e-PASS**", a subscriber can get information about his/her account status and have a detailed transaction statement from the very first day of his/her subscription.

## MOBILE APP

The Attika Tollway **my e-PASS** application for mobile phones allows the subscriber to enjoy the features of the web service. Inter alia, the subscriber can easily renew his/her subscription account using a bank card.

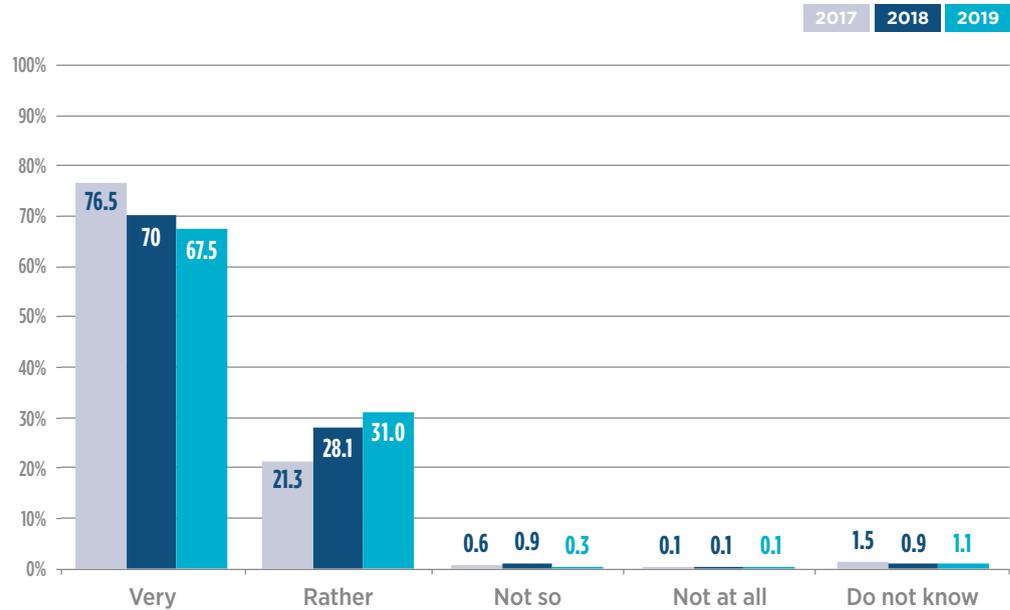

## CUSTOMER SERVICE CENTRES (C.S.C.)

The company operates thirteen **(13)** Customer Service Centres (C.S.C.): nine **(9)** on Attika Tollway, three **(3)** on Moreas Motorway and one **NEW** Customer Service Centre in the facilities of "I. KTEO Maroussi I/C" for which no entry on Attika Tollway is required. The C.S.C.'s personnel informs users about the subscription programmes available, as well as about any issue relevant to the motorway.

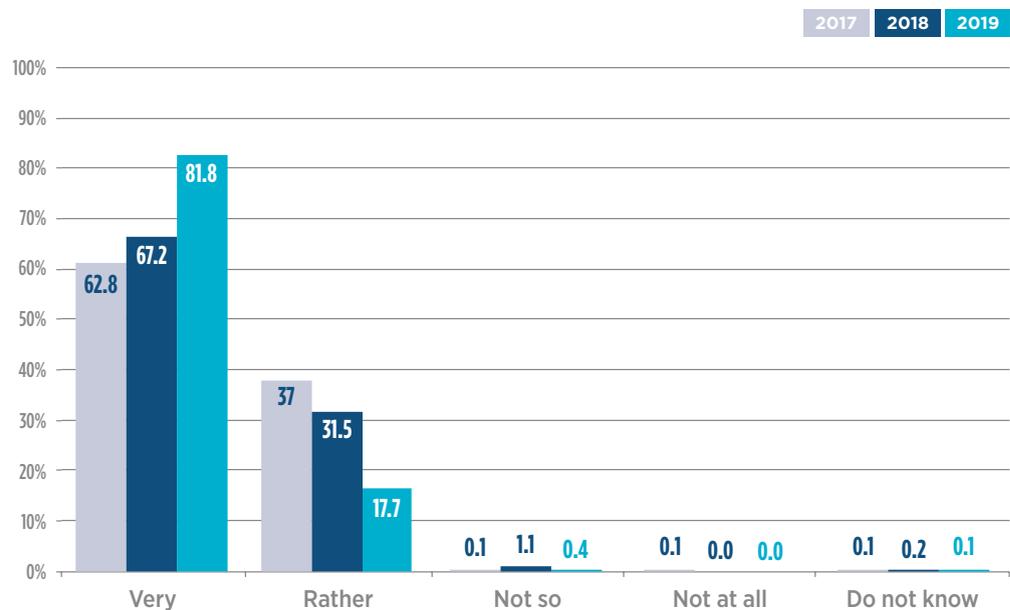

**DEGREE OF SATISFACTION WITH THE SERVICE AND THE CONDUCT OF THE CUSTOMER SERVICE CENTRES EMPLOYEES (%)**

A survey, conducted by Invision/Metron Analysis in 2019\*, showed that the motorway users' satisfaction percentage by the services at the C.S.C. remains very high, since **98.5%** are very or quite satisfied with the service, provided at the Customer Service Centres.

As shown in the chart below, based on a survey on Attica Tollway users, the level of satisfaction of Attica Tollway users as regards the behaviour of toll employees reaches **99.5%**.

**DEGREE OF SATISFACTION WITH THE CONDUCT OF THE TOLL SERVICE EMPLOYEES (%)**

\* In 2021, as in 2020, due to the exceptional circumstances created by the COVID-19 pandemic, the relevant survey was not carried out.

# SUSTAINABLE **DEVELOPMENT**

## SOCIETY

### Road safety awareness programmes & actions

For the Concession Company “Attiki Odos S.A.” and the Operation and Maintenance Company “Attikes Diadromes S.A.”, Sustainable Development is an ever-present quest and a daily practice. More specifically, by focusing on the 4 pillars of sustainable development, namely **Employees, Society, Market, Environment**, the two companies demonstrate remarkable and, above all, measurable results that confirm their absolute commitment in this direction.

During 2021, “Attiki Odos S.A.” and “Attikes Diadromes S.A.” supported the implementation of **five (5) educational programmes** which convey the message of Road Safety to children and adolescents:

① The e-Learning programme **“Eyes Open on the Road”** for students of middle and high school, has received the approval of the Ministry of Education and Religious Affairs and the Institute of Educational Policy. This is the evolution of the interactive seminar under the same name, created in order to meet the challenges of the digital age, with the aim of raising awareness around the important issue of road safety, in a modern and effective way, among students and teachers throughout Greece, and especially those in the most remote islands and villages. In 2021, more than 4,200 students gained access to the online programme of Attica Tollway.

② The interactive exhibit entitled **“I Drive and Walk Safely”**, which can be visited on the ground floor of the Children’s Museum of Athens, was designed by an interdisciplinary working group with the participation of educators and museologists from the Hellenic Children’s Museum and transport specialists from “Attiki Odos S.A.” and “Attikes Diadromes S.A.” and was implemented after a six-month study aimed at promoting traffic education in children 3 to 12 years old. In this space, through play, creation, collaboration and active participation, children interact with each other, but also with the Museum performers and the adults who play with them, discover how to move on the street, the crossings and traffic lights and recognise the signs they come across on the street. In 2021 the Children’s Museum of Athens remained closed until June 4 due to the COVID-19 pandemic and opened to the public on June 5 with limited opening hours and participation in specific time zones. This year, 1,453 children and 1,032 adults visited the “I Drive and Walk Safely” exhibit.

③ The experiential educational play **“Attikoulis”** was presented for the first time in 2006, while in 2020 its 6<sup>th</sup> scenario renewal was completed. It is a two-hour play that aims to bring the children of nursery and primary schools in contact with the basic principles of road safety, in a creative and interactive way. By the end of 2019, 62,000 children had attended the play, but in 2021, as in 2020, the renewed show, entitled **“Attikoulis in the kingdom of Clumsiness”**, was not presented in schools and municipalities, due to the exceptional circumstances created by the COVID-19 pandemic.

④ The music and dance performance **“The Asphalt Troubadours”** featuring the Burger Project band, constitutes a new initiative of Attica Tollway addressed to nursery and primary

school children. In the context of the show, children become familiar with the basic rules of the Traffic Code, the correct conduct of pedestrians, cyclists and skaters, while learning about the importance of the safety belt, the helmet and the appropriate driving equipment. In 2021 the creation of the new educational play was completed, however it was not presented in schools and municipalities, due to the emergency conditions created by the COVID-19 pandemic.

⑤ The educational programme **"In traffic with safety"**, which is implemented for over a decade in schools and other spaces by specially trained animators, in collaboration with the Road Safety Institute "Panos Mylonas", is approved by the Ministry of Education and Religious Affairs and the Institute of Educational Policy. In 2021 the educational programme continued to be implemented in nursery schools, primary schools and children's camps, with restrictions, due to the emergency conditions created by the COVID-19 pandemic and more than 2,000 children participated. In total, over the years, more than 76,400 children have attended it, with the support of Attica Tollway.

- ▶ In 2021, Attica Tollway created four (4) videos starring Thanassis Choundras, driving instructor, which have been posted on Attica Tollway YouTube channel, conveying in a different way tips for safe driving. The videos are about important issues the driver has to deal with, and in particular, the distraction, the consequences of fatigue while driving, as well as advice to cyclists on the appropriate equipment and their protection in case of rain.
- ▶ In 2021, Attica Tollway supported for the second time the effort of EKAB (National Emergency Aid Centre) motorcycle response unit, covering their training needs in safe driving through a specialised program under the guidance of specialist Thanassis Choundras. More precisely, in October, twenty (20) motorcyclists - rescuers continued their training, while two (2) more people who recently joined the corps also completed their training.
- ▶ In 2021, Attica Tollway carried out an extensive advertising campaign through banners on news websites with the aim of further promoting the educational programmes it implements on Road Safety culture to children and adolescents.

"Attiki Odos S.A." and "Attikes Diadromes S.A." always stand on the side of local communities. Among other things, they favor instead of corporate gifts during the Christmas period, the support of NGOs and other organisations that offer work of value to society. At the same time, the companies respond to the extraordinary requests and needs of the society, with emphasis on the support of organisations/bodies that are active in areas that are affected by the motorway.

In this context, in 2021 the companies made donations to NGOs and other organisations, totalling over € 42,000. More specifically:

- ▶ An amount of € 10,000 was allocated to the "Diazoma" Association;
- ▶ An amount of € 5,000 was allocated to the Municipality of Peania, for the purpose of paving a yard with non-slip carpet in the 3<sup>rd</sup> Primary School of Peania, for the safety of

**Actions to raise awareness and educate the society as well as individual groups vulnerable on the streets**

**Donations & offers to NGOs and other organisations**

children while playing;

- ▶ An amount of € 6,200 was allocated to the Hellenic Animal Welfare Society with the aim of supporting the organisation in the collection and protection of stray and abandoned animals and in the care of injured animals;
- ▶ An amount of € 3,600 was allocated to the Speech, Writing and Communication Rehabilitation Centre "Dynamai";
- ▶ An amount of € 3,200 was allocated to the "SOTIRIA" General Hospital of Thoracic Diseases of Athens for the supply of necessary medical equipment;
- ▶ The amount of € 2,000 in vouchers was allocated to the Association of Lofos Kyrillou;
- ▶ The amount of € 1,500 in vouchers was allocated to the Special Education Centre for Children and Adults with Disabilities "Horizons";
- ▶ The amount of € 1,500 in vouchers was allocated to the Association of Parents, Guardians and Friends of People with Special Needs "The Workshop";
- ▶ The amount of € 1,500 in vouchers was allocated to the Association of Parents, Guardians and Friends of Autistic Children "S.O.S.";
- ▶ The amount of € 1,500 in vouchers was allocated to the "Bridge of Life for People with Special Needs";
- ▶ The amount of € 1,500 in vouchers was allocated to the Scientific Association of Adapted Activities "Victor Artant - NIKI";
- ▶ The amount of € 1,500 in vouchers was allocated to the Christian Home for Girls "Agia Anna";
- ▶ The amount of € 1,500 was allocated to the Charity Fund of the Holy Metropolis of Gortynos and Megalopolis;
- ▶ The amount of € 1,000 was allocated to the Association for the Protection and Care of Wildlife "ANIMA";
- ▶ The amount of € 500 was allocated to the "Ark of the World";
- ▶ The amount of € 500 was allocated to Forest Wide;
- ▶ The amount of € 280 in vouchers was allocated to the Normative National Nursing Home in Kallithea.

Moreover, in 2021, the donation of € 17,500 to the University General Hospital "Attikon" for the supply of additional hospital equipment to combat the spread of coronavirus COVID-19, was completed.

In addition, the companies provided a total of seven (7) PCs and one (1) printer for the needs of the 2<sup>nd</sup> Primary School of Peristeri, the 3<sup>rd</sup> Primary School of Kifissia and the Holy Metropolis of Veria, Naoussa and Kampania (Church of Agios Georgios Naousis). They also responded to the request of the Municipality of Spata - Artemis for the provision of safety barriers, while this year they supported the annual event of the Hellenic Institute of Transportation Engineers, providing an e-PASS transponder with credit for the lottery that took place during the ceremony.

Constantly present at important events, "Attiki Odos S.A." and "Attikes Diadromes S.A." supported the following events with sponsorships totalling over € 28,000:

- ▶ 3<sup>rd</sup> European Conference EuroEngeo2020 of the International Association for Engineering Geology and the Environment (IAEG) held between 6 - 10 October 2021.
- ▶ 31<sup>st</sup> Panhellenic Conference of the Federation of Greek Construction Machinery Operators - held on 30 and 31 October 2021.
- ▶ 1<sup>st</sup> Forum of the Association for the Protection and Development of Imittos on "The ten rules to save our Forests - Local Government at the heart of Civil Protection" held on 16 November 2021.
- ▶ 7<sup>th</sup> Conference of the Hellenic Organisation of Intelligent Transport Systems (ITS Hellas) on "Transportation & Logistics 4.0: Exploring Innovation" held on 8 and 9 December 2021.

Finally, it is noted that the administrative personnel of the Hellenic Institute of Customer Service (EIEP) is hosted at the companies' premises. In 2021 the Institute held important events such as the Greek Excellence (11 November 2021) and the National Customer Service Awards (21 December 2021).

- ▶ Updates via Variable Message Signs (VMS), in collaboration with the association "The Smile of the Child". The programme is implemented under the Amber Alert National Emergency Response Plan.
- ▶ As part of the continuous improvement of the services provided, the operation and maintenance company, "Attikes Diadromes S.A.", is a member of the Hellenic Institute of Customer Service, the reputable organisation that promotes customer service in our country.
- ▶ Collaborations with agencies promoting road safety in our country and abroad. Some of them are: the Special Committee of Road Safety of the Hellenic Parliament, the Hellenic Federation of Transportation Engineers, the Road Safety Institute "Panos Mylonas" (RSI) and many more.
- ▶ Participation of company executives as members of committees in national and international bodies defining the international standards of transport and motorway operation, such as HELLASTRON (HELLenic ASSociation of Toll ROad Network), the European Association of Operators of Toll Road infrastructures (Association Européenne des Concessionnaires d' Autoroutes et d' Ouvrages à Péage - ASECAP), the US Transportation Research Board of the National Academies (TRB), the International Road Federation (IRF) and the International Bridge, Tunnel and Turnpike Association (IBTTA).
- ▶ Partnerships and support of Universities and, generally, educational organisations.

## Sponsorships to support events

## Collaborations with various bodies

## EMPLOYEES

The success of the two companies is largely due to their employees, who work daily, with dedication and conscientiousness, to provide high quality services to Attika Tollway users (and Egnatia Odos users, through the personnel employed at the toll stations). In 2021:

- ▶ The two companies employed **1,664** employees (**1,604** employed by “Attikes Diadromes S.A.” and **60** employed by “Attiki Odos S.A.”), of whom **727** males and **937** females.
- ▶ All employees were trained for a total of **11,117** hours on various subjects related to their professional field.
- ▶ **417** blood units from **216** volunteer blood donors were offered to the Corporate Blood Bank.
- ▶ Additional benefits were offered to employees, related to medical coverage, summer camps, monthly allowance for nursery school, gift vouchers, scholarships, events and training.

## MARKET

The two companies, since the beginning of their operation, have a responsible attitude towards their customers and suppliers. In 2021:

- ▶ The operation and maintenance company “Attikes Diadromes S.A.” handled **23,326** incidents with an average response time of **5.8** minutes.
- ▶ The Telephone Customer Service department received **356,393** calls, which were answered within **1' 46"** in average and from which **678,037** issues resulted, while also **12,877** outgoing calls were made.
- ▶ The user satisfaction level for the relevant services provided and the behaviour of the employees of the T.C.S. department exceeded **95.5%\***.
- ▶ The user satisfaction level as regards the behaviour of the toll employees reached **99.5%\***.
- ▶ The two companies have **5 ISO certifications** since the beginning of their operation.

*\* In accordance with the survey conducted in 2019. In 2021, as in 2020, due to the exceptional circumstances created by the COVID-19 pandemic, the relevant survey was not carried out.*

## ENVIRONMENT

Environmental protection continues to be a priority for both companies. In 2021:

- ▶ **800,000** trees and bushes and **78,000 m<sup>2</sup>** of lawn were maintained.
- ▶ **1,560 kg** of plastic, **1,918 kg** of tires and **15,235 kg** of iron were recycled.
- ▶ **127** 24-hour measurements were carried out by mobile noise measurement units. Based on the measurements, no supplementary noise barriers were installed.

# AWARDS & CERTIFICATIONS

**2003**

## **NOISE PROTECTION - CONSEIL NATIONAL DE BRUIT PRIZE**

A special study has been conducted and measures have been taken for the systematic noise management in Attica Tollway. Special noise barriers have been installed across the motorway covering many kilometres, effectively reducing noise. This effort was awarded the Prize “Décibel d’ Or” from the Conseil National de Bruit (CNB) of France, in the category “City and Road Transportation”, for the implementation of the programme “Noise pollution, management and reduction at Attica Tollway”.

**2004**

## **ARTISTIC LANDSCAPE DESIGN / PAN-EUROPEAN AWARD**

The construction of the motorway was combined with art, through the cooperation with the landscape sculptor, Nella Golanda, who created a unique aesthetic result, as the Western Peripheral Motorway of Imittos is characterized as a “sculpture road”. This artistic intervention won a significant award in the 2004 European Competition “European Urban Prize for Urban Public Space”, which was organised by the Centre of Contemporary Art of Barcelona and the Architecture Institutes of France, Denmark and Austria.

**2005**

## **CONTRIBUTION TO ROAD SAFETY / 1<sup>ST</sup> PRIZE FROM THE INTERNATIONAL ROAD FEDERATION**

Road safety determined the construction of Attica Tollway, which was completed based on high international standards, while it is constantly pursued as an objective of its operation. Attica Tollway introduced a new framework in the road safety sector, by providing high-quality services, and won international recognition as the International Road Federation awarded “Attikes Diadromes S.A.” the 1<sup>st</sup> European Prize for its contribution to road safety.

**2007**

## **CONTRIBUTION TO ROAD SAFETY / GREEK ROAD FEDERATION PRIZE**

The Greek Road Federation, within the framework of the International Conference “Roads of the Future”, which was organised by the University of Patras and under the auspices of the Ministry of Transport and Communications, the Technical Chamber of Greece and the International Road Federation, awarded a prize to “Attikes Diadromes S.A.” for its contribution to road safety.

### **2008, 2007, 2006 TOLL MANAGEMENT / CERTIFICATES OF MERIT FROM THE INTERNATIONAL BRIDGE, TUNNEL AND TURNPIKE ASSOCIATION (IBTTA)**

The basic goal of the Attika Tollway's Commercial Department, which is responsible for the management of the toll stations and Customer Service, is the provision of high quality services. This resulted in successive awards (Certificate of Merit-Toll Excellence Award) by the International Bridge, Tunnel and Turnpike Association for the contribution in the progress of toll motorways management.

### **2008 GIS TECHNOLOGY IMPLEMENTATION / 1<sup>ST</sup> ESRI PRIZE**

The GIS technology (Geographic Information Systems) is a basic parameter of the IT infrastructure of the company "Attikes Diadromes S.A.". The use of this advanced GIS technology and the continuous integration of the technological developments in this sector, were acknowledged by the "Special Achievement in GIS" award.

### **2008 ENVIRONMENTAL MANAGEMENT / 1<sup>ST</sup> PRIZE OF THE INTERNATIONAL ROAD FEDERATION (IRF)**

The environmental-friendly procedures of operation and maintenance (flood control, restoration and reforestation of old quarries etc.) won the 1<sup>st</sup> Prize in the Environmental Mitigation category, awarded to "Attikes Diadromes S.A." by the International Road Federation (IRF).

### **2009 PROJECT MANAGEMENT / 1<sup>ST</sup> PRIZE FROM THE INTERNATIONAL BRIDGE, TUNNEL AND TURNPIKE ASSOCIATION (IBTTA)**

"Attiki Odos S.A." and "Attikes Diadromes S.A." were honoured with the 1<sup>st</sup> Prize on the "Toll Excellence Award-Administration Category" from the International Bridge, Tunnel and Turnpike Association for Project Management. With this "Toll Excellence Award", which is the capstone of awards and a special honour title for every company and entity being active in the motorway sector, the companies were awarded for the implementation of the innovative programme "Monitoring the Success", which was set by the company's Management, for recording and continuous monitoring of Performance Indices, aiming to improve the services provided.

**2009**  
**SUSTAINABLE CONSTRUCTION: EUROPEAN AWARD**  
**TO “ELLAKTOR S.A.” FOR THE IMITTOS WESTERN**  
**PERIPHERAL MOTORWAY**

“ELLAKTOR”, the construction company leading the construction of Attica Tollway, won the “Sustainable Construction” award for the environmental management performed during the construction of the Imittos Western Peripheral Motorway in the Greek Business Awards for the Environment of the European Commission (European Business Awards for the Environment).

**2010, 2009**  
**ROAD SAFETY CAMPAIGNS / 1<sup>ST</sup> PRIZE CEO & CSR MONEY**  
**CONFERENCE**

Attica Tollway is regularly conducting awareness campaigns to promote road safety culture in society. The campaign messages aim towards special groups, based on communication needs. The special campaign focused on motorcycle drivers (informational and awareness campaign on safe driving, publication and distribution of a guide with tips on safe motorcycle driving), within the wider framework of educational activities on road safety, was awarded the 1<sup>st</sup> Prize during the Convention “CEO & CSR 2009”, organised by Money Conference, in cooperation with Euro Charity. In the same event of 2010, the safe driving campaign for motorcycles and cars won the first prize for social campaign once again.

**2010**  
**SAFEST ROAD / 1<sup>ST</sup> AUTOMOTIVE PRIZE**

During the Automotive Awards, Attica Tollway won the 1<sup>st</sup> Prize for being the “Safest Road in Greece”, based on the low car accident indices and on the safety standards of construction and operation.

**2011**  
**CUSTOMER SERVICE AWARDS / 1<sup>ST</sup> PRIZE IN THE CATEGORY**  
**“BACK OFFICE” BY THE GREEK INSTITUTE OF CUSTOMER SERVICE**

“Attikes Diadromes S.A.”, the company operating Attica Tollway, was awarded the first prize in the category “Team of the Year: Back Office” for the year 2011. The National Customer Service Awards are awarded by the Greek Institute of Customer Service (EIEP), a nonprofit organisation founded in 2004. The Back Office teams of “Attikes Diadromes S.A.” support and contribute to the optimal service offered in the Toll Stations of the Motorway, the Customer Service Centres, the Telephone Customer Service, the online services, the Emergency Phone Number 1024 and the Patrol and Intervention Teams in case of incidents.

### 2011 RECOGNITION FOR THE MEASUREMENT / REDUCTION OF CARBON FOOTPRINT WITHIN THE FRAMEWORK OF MYCLIMATE AWARDS

“Attikes Diadromes S.A.” excelled at MyClimate awards “Green Leader Calculation and Reduction of Carbon Footprint”, which was organised in Greece for the first time by the Centre for Sustainability and Excellence (CSE).

### 2014 ENVIRONMENTAL AWARDS

The operation and maintenance company of Attica Tollway, “Attikes Diadromes S.A.”, was awarded a Silver Award in the category “Sustainable Infrastructure Development” at Environmental Awards established by the company Boussias Communications and Plant Management. “Attikes Diadromes S.A.” was awarded the silver prize for the best practices it implements for environmental protection, aiming at harmonising the operation of the motorway with the natural environment and stood out among enterprises, organisations and institutions that have implemented projects for renovation and modernisation of buildings or urban areas, and / or innovative urban solutions geared to improve their energy efficiency, protect the environment, reduce operating costs, improve the infrastructure and the lifestyle/service of the citizens, the governance and sustainability.

### 2014 WORKING ENVIRONMENT / DISTINCTION FOR THE LEVEL OF HEALTH AND SAFETY AT WORK

The operation and maintenance company of Attica Tollway, “Attikes Diadromes S.A.”, was awarded during the Health & Safety Awards 2014 competition, organised under the auspices of the Hellenic Federation of Enterprises with the support of the Greek Institute for Occupational Health and Safety (ELINYAE). The company received the Silver Award in the category “Transportation and Transport Infrastructures”. This distinction rewards “Attikes Diadromes S.A.” for the implementation of coordinated and certified strategy aiming at the minimisation of labour accidents and the participation, information and ongoing training of human resources in occupational health and safety, as well as in environmental protection.

## 2014 SAFER GREEK MOTORWAY UNDER INTERNATIONAL ASSESSMENT PROTOCOLS EuroRAP AISBL

The Attica Tollway demonstrated high performance during the measurements conducted by the European Road Assessment Programme EuroRAP AISBL on the basis of accredited methodology and protocols: very low concentration of fatal accidents in relation to the number of vehicles using the tollway and the distances covered; high rating up to 5stars during the inspection and surveying of the actual situation of the motorway through the evaluation of more than 50 characteristic elements of motorways.

## 2015 ROAD SAFETY / “EXCELLENCE IN ROAD SAFETY AWARD 2015” / EUROPEAN COMMISSION

The prize relates to two targeted actions performed by the companies in order to raise awareness among children and adolescents on road safety: the interactive educational programme for nursery and primary school children “Attikoulis”, and the programme for high school students “Eyes Open on the Road!” which has been approved by the Ministry of Education and Religious Affairs.

Distinction at “The Protagonists Of Greek Economy”, organised by Direction Business Network.

2015

# CERTIFICATIONS

56

## **ISO 14001: 2015**

### **CERTIFICATION ON ENVIRONMENTAL MANAGEMENT**

This certification refers to the integrated system, based on which the companies implement their environmental management agenda and comply with current national and European legislation regulations. The certification of “Attiki Odos S.A.” and “Attikes Diadromes S.A.” in accordance with ISO 14001: 2015 refers to the reduction of waste, noise and disturbance caused by the motorway’s operation, the protection of the ancient monuments found during construction, the conservation of green areas and the proper management of natural resources, all of which are necessary for the motorway’s operation, etc.

## **ISO 50001: 2018**

### **CERTIFICATION FOR ENERGY MANAGEMENT SYSTEMS**

The Energy Management System is developed in accordance with the requirements of the International Standard ISO 50001: 2018 and constitutes the framework on the basis of which “Attiki Odos S.A.” and “Attikes Diadromes S.A.” manage energy-related issues. The purpose of the development and implementation of the Energy Management System is the overall and unified energy planning, aiming at saving energy and contributing to the achievement of reduction in national energy consumption as well as to halting climate change.

## **ISO 45001: 2018**

### **CERTIFICATION ON EMPLOYEE HEALTH AND SAFETY MANAGEMENT**

The ISO 45001: 2018 certification of “Attiki Odos S.A.” and “Attikes Diadromes S.A.” relates to the implementation of the health and safety management system at work, with the integration of health and safety issues in all activities and with the active participation of all levels of employees to provide improved practices in the overall operation of the motorway. It is certified that the work environment improves continuously, that occupational hazards are prevented and minimised, that human resources are continuously informed and trained on health and safety at work, that the health of employees is continuously monitored by the occupational physician, etc. The Management of the companies undertakes an active role and is committed to the observance and continuous improvement of the health and safety management system at work and to compliance with the relevant legislative and regulatory requirements.

### **ISO 9001: 2015**

#### **CERTIFICATION ON QUALITY MANAGEMENT SYSTEM**

By implementing the Quality Management System according to ISO 9001: 2015, “Attikes Diadromes S.A.” achieves the effective management of the projects undertaken, through the implementation and observance of specific processes and procedures, fully responding to the rules of science and art. When designing the Quality Management System, the company takes into account the operating framework of the organisation, as well as the requirements of the stakeholders regarding the system. In this way, the company ensures a high level of customer service through processes that support its activities with transparency. The Management of the company is committed to the continuous improvement of the quality management system at all levels and to its compliance with the legal and regulatory requirements.

### **ISO 39001: 2012**

#### **CERTIFICATION FOR THE ROAD TRAFFIC SAFETY MANAGEMENT SYSTEM**

The Operation Company of Attica Tollway, “Attikes Diadromes S.A.”, with the implementation of the Road Safety Management System and the implementation of its activities based on the requirements of the standard ISO 39001: 2012, is committed to comply with specific processes and procedures for the safe circulation of its vehicles, reducing as much as possible the incidents involving its staff on the motorway, fully observing the rules of science and art. It also commits to continuously improving the Road Safety Management System at all levels. The Management of the company monitors and controls its objectives regarding road safety, in order to confirm the effectiveness of the Road Safety Management System and to launch the necessary actions in order to fulfill the system requirements.

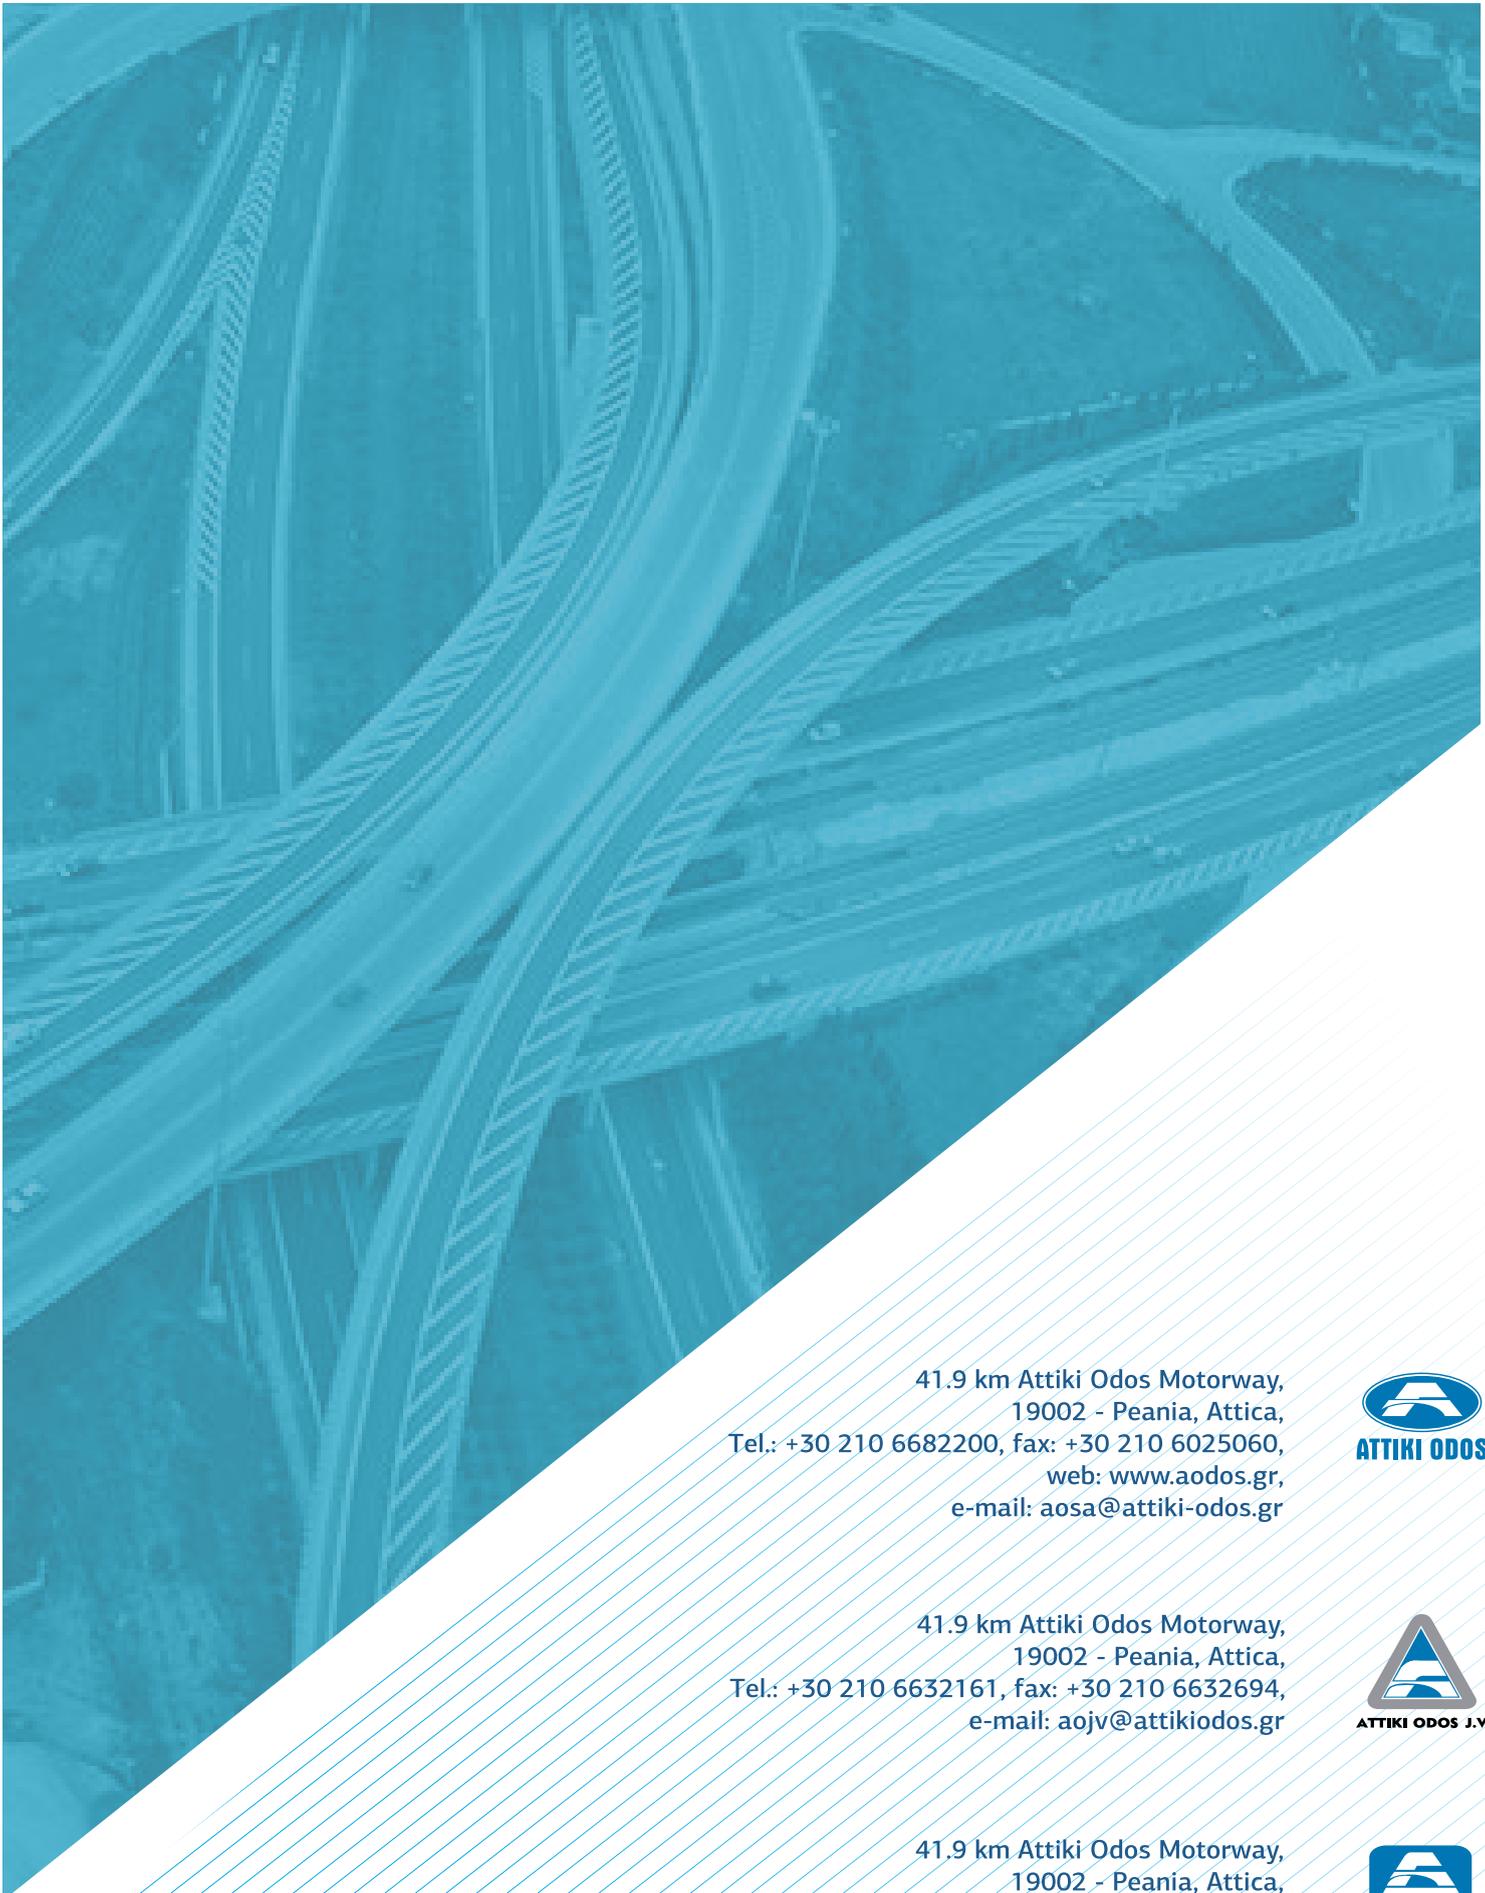

## CONCLUSION

In 2021, Attica Tollway continued to consistently serve its supreme mission, remaining a reliable companion in the daily trips of thousands of people.

In pandemic conditions for a second year, "Attiki Odos S.A." and "Attikes Diadromes S.A." adapted to the new reality with an operational plan and took all necessary measures with a view to protecting the health and safety of personnel, associates, and of course motorway users, even going beyond the framework set by the Greek State.

Regarding the traffic volumes on Attica Tollway, the restrictions imposed on transportation also affected the vehicle entries this year, with the toll transactions decreasing by 11% compared to 2019, i.e. the pre-pandemic levels. However, the determination of the two companies to develop and create value inside and outside the limits of the motorway remained firm, developing responsible practices at all levels. In this context, the operation company, in a total of 23,326 incidents, was present in less than 6 minutes on average, where there was a need to offer assistance. The enlarged green zones of Attica Tollway were carefully maintained by the specialised staff employed on a permanent basis for the care of 800,000 trees and shrubs and 78,000 sq.m. of lawn of the motorway. At the same time, the companies made donations to NGOs and other organisations that offer work of value to society, while, faithful to their vision for the promotion of the road safety culture in our country, they took initiatives and implemented actions to initiate children and adolescents into this cause.

Attica Tollway, a reference in the field of modern motorways, will continue to invest in the improvement of the services provided, with the long-term goal of safety and service. At the same time, it declares itself present and ready to welcome the next day, guided by its values: next to the users, on the side of the employees, close to the local communities, with respect for the environment.
